M15 Matsd Speng Tz:

British Plant Communities J. S. Rodwell, 1998-04-30 *British Plant Communities* is the first systematic and comprehensive account of the vegetation types of this country. It covers all natural, semi-natural, and major artificial habitats in Great Britain but not Northern Ireland, representing the fruits of fifteen years of research by leading plant ecologists. The book breaks new ground in wedding the rigorous interest in the classification of plant communities that has characterized Continental phytosociology with the deep concern traditional in Great Britain to understand how vegetation works. The published volumes have been greeted with universal acclaim, and the series has become firmly established as a framework for a wide variety of teaching, research, and management activities in ecology, conservation, and land use planning.
