Always treading the line between research and fiction, her projects result from in-depth investigations and collaborations with specialists and scientists. At the Palais de Tokyo and Nottingham Contemporary, Humeau is offering a series of unique physical and sensory experiences. Her exhibition FOXP2 is named for the gene whose mutation enabled the arrival of articulate language at the source of our humanity. Here, the artist is re-enacting the origins of life and the development of conscious life forms. Imagining a world where giant elephants dominate the planet, Humeau has artificially designed creatures endowed with emotions and consciousness. **Book Contents:** A conversation between Marguerite Humeau and Bernard Buigues.
