Linear Motion Review Packet:

Short Review of the Unitary Quantum Theory Leo G. Sapogin, V. A. Dzhaniybekov, Yu. A. Ryabov³, The paper proposes a model of a unitary quantum field theory where the particle is represented as a wave packet The frequency dispersion equation is chosen so that the packet periodically appears and disappears without changing its form The envelope of the process is identified with a conventional wave function Equation of such a field is nonlinear and relativistically invariant With proper adjustments they are reduced to Dirac Schrodinger and Hamilton Jacobi equations A number of new experimental effects are predicted both for high and low energies **The Physical Review Supplement** ,1929 **Advanced**
