 Louis, Lucile Maertens, 2021-04-05 Building on the concept of depoliticization this book provides a first systematic analysis of
 International Organizations IO apolitical claims It shows that depoliticization sustains IO everyday activities while allowing
 them to remain engaged in politics even when they pretend not to Delving into the inner dynamics of global governance this
 book develops an analytical framework on why IOs hate politics by bringing together practices and logics of depoliticization
 in a wide variety of historical geographic and organizational contexts With multiple case studies in the fields of labor rights
 and economic regulation environmental protection development and humanitarian aid peacekeeping among others this book
 shows that depoliticization is enacted in a series of overlapping sometimes mundane practices resulting from the complex
 interaction between professional habits organizational cultures and individual tactics By approaching the consequences of
 these practices in terms of logics the book addresses the instrumental dimension of depoliticization without assuming that IO
 actors necessarily intend to depoliticize their action or global problems For IO scholars and students this book sheds new
 light on IO politics by clarifying one often taken for granted dimension of their everyday activities precisely that of
 depoliticization It will also be of interest to other researchers working in the fields of political science international relations
