What is salient to us and what we attend to play a fundamental role in shaping how we perceive think about and act in the world Salience and attention shape our mental lives in ways that have profound epistemic significance determining how we gather evidence what sorts of inquiries we undertake and what we do with the beliefs we form as the result of that And yet they haven t traditionally fallen within the purview of epistemology We have a lacuna in our epistemic resources What should be salient to us What should we attend to How should we evaluate how we prioritize and select information We need a framework for evaluating salience and attention from a distinctively epistemic perspective This book proposes a novel construct salience structures which describe how our informational landscape is contoured by a range of causes reflecting what is salient to us and what we are likely to attend to It offers an evaluative framework for salience structures describing the epistemic norms which apply to them It applies that framework to a range of phenomena including ignorance and inquiry showing how it helps us better understand the nature of prejudice and the role of search engines in our lives The book develops several themes Firstly the framework provides new ways of engaging with negative epistemology the project of understanding and evaluating the negative space of information we deprioritize and forget attitudes we don t form and questions we fail to ask Secondly the domain of the epistemic is richer and more various than we have sometimes allowed But it also needs to be kept in its place we value many things that do not fall within its aegis Finally the epistemic role of salience structures is in competition with the many practical purposes they must serve for us How deep that tension runs depends on facts about our social organization We should strive to build just societies that minimize the practical costs of epistemically optimal salience structures Designing Web Navigation James Kalbach,2007 Provides information on basic Web design and development techniques to create effective navigation systems □□□□□□□□□□□□□□□□ □□□□□□□□□□ □,2009-05-22 3 1 2 3 **Handbuch der Webnavigation** James Kalbach,2008 The Times Index ,2009 Indexes the Times Sunday times and magazine Times literary supplement Times educational supplement Times educational supplement Scotland and the Times higher education supplement UAZ Owner's Manual User Guide Toly Zaychikov,2019-01-24 Book in English All you need to know about UAZ *Toyota Corolla Owners Workshop Manual* John Harold Haynes,B.
