Handbook of Cross-Cultural and Multicultural Personality Assessment Richard H. Dana, 2000-02 Throughout the world as in the United States psychologists are increasingly being called upon to evaluate clients whose backgrounds differ from their own It has long been recognized that standard personality and psychopathology assessment instruments carry cultural biases and in recent years efforts to correct these biases have accelerated The Handbook of Cross Cultural and Multicultural Personality Assessment brings together researchers and practitioners from 12 countries with diverse ethnic and racial identities and training to present state of the art knowledge about how best to minimize cultural biases in the assessment of personality and psychopathology They consider research methodology the design and construction of standard objective and projective tests the use of measures of acculturation racial identity and culture specific tests the social etiquette of service delivery and the interpretation of test data for clinical diagnosis Ranging widely through all the relevant issues they share a common collective vision of how culturally competent services should be delivered to clients The Handbook offers the first comprehensive view of a consistent approach to cultural competence in assessment a necessary precursor of effective intervention It will become an indispensable reference for all those whose practice or research involves individuals with different ethnic and racial identities

Glover, Royce R. Ronning, Cecil R. Reynolds, 2013-03-09 The motivation underlying our development of a handbook of creativity was different from what usually is described by editors of other such volumes Our sense that a handbook was needed sprang not from a deluge of highly erudite studies calling out for organization nor did it stem from a belief that the field had become so fully articulated that such a book was necessary to provide summation and reference Instead this handbook was conceptualized as an attempt to provide structure and organization for a field of study that from our perspective had come to be a large scale example of a degenerating research program see Brown Chapter 1 The handbook grew out of a series of discussions that spanned several years At the heart of

most of our interactions was a profound unhappiness with the state of research on creativity Our consensus was that the number of good works published on creativity each year was small and growing smaller Further we could not point to a journal text or professional organization that was providing leadership for the field in shaping a scientifically sound framework for the development of research programs in creativity At the same time we were casting about for a means of honoring a dear friend E Paul Torrance Our decision was that we might best be able to honor Paul and influence research on creativity by developing a handbook designed to challenge traditional perspectives while offering research agendas based on contemporary psychological views      **Carmichael's Manual of Child Psychology** Leonard Carmichael,1970
