*Economic Logic Fourth Edition* Mark Skousen, 2013-10-22. Eureka Skousen has done the impossible. Students love it. I will never use another textbook again. Harry Veryser, University of Detroit Mercy. They said it couldn't be done. Austrian economics is so different they said that it couldn't be integrated into standard neo-classical textbooks. Consequently, college students learn nothing about the great Austrian economists: Mises, Hayek, Schumpeter. Professor Mark Skousen's *Economic Logic* aims to change that. Based on his popular course taught at Columbia University, Skousen starts his micro section with Carl Menger's theory of the good and the profit and loss income statement to explain the dynamics of the market process, entrepreneurship, and the advantages of saving. Then he uses a powerful Hayekian four-stage model of the economy to introduce macro, including a new Austrian measure of spending at all stages of production: Gross Domestic Expenditures. *Economic Logic* also offers chapters on The international gold standard, the defects of central banking, and the Mises-Hayek theory of the business cycle. A full critique of the Keynesian Aggregate Supply and Demand (AS-AD) model and a revolutionary Austrian alternative. Entrepreneurship, the financial markets, environmental economics, monetary policy, and inflation, federal spending, and taxes, and government regulation. Leaders of all schools, including Austrian, Keynesians, Marxist, Chicago, and Public Choice.

*Forestry Economics* John E. Wagner, 2023-12-22. *Forestry Economics* introduces students and practitioners to the economics of managing forests and forest enterprises. The book adopts the approach of managerial economics textbooks and applies this to the unique problems and production processes faced by managers of forests and forest enterprises. What many future forest and natural resource managers need is to understand what economic information is and how to use it to make better business and management decisions. John E. Wagner draws on his 30 years of experience teaching and working in the field of forest resource economics to present students with an accessible understanding of the unique production processes and problems faced by forest and other natural resource managers. The second edition has been updated to include: Expanded discussion of compounding, discounting, and capital budgeting, as well as an expanded discussion of when to replace a capital asset that has i) costs but no direct revenue stream such as a machine, ii) costs and a direct annual revenue stream such as a solar array, or iii) costs and a periodic revenue stream illustrated by the forest rotation.
