MAIN IDEA

Plants have many different parts. They have roots. The roots grow into the ground and help keep the plant from blowing away. They also suck up water from the soil for the plant. Plants have stems too. The stems have leaves attached to them. The leaves catch sunlight and turn it into food for the plant.

The main idea is:

- a. Plants use sunlight for food.
- b. The roots of a plant suck up water from the soil.
- c. Plants have many different parts like roots, stems, and leaves.

Handbook of Children's Literacy Terezinha Nunes, Peter Bryant, 2013-03-09 PETER BRYANT TEREZINHA NUNES The
time that it takes children to learn to read varies greatly between different orthographies as the chapter by Sprenger
Charolles clearly shows and so do the difficulties that they encounter in learning about their own orthography Nevertheless
most people who have the chance to learn to read do in the end read well enough even though a large number experience
some significant difficulties on the way Most of them eventually become reasonably efficient spellers too even though they go
on make spelling mistakes at any rate if they are English speakers for the rest of their lives So the majority of humans plainly
does have intellectual resources that are needed for reading and writing but it does not always find these resources easy to
marshal What are these resources Do any of them have to be acquired Do different orthographies make quite different
demands on the intellect Do people differ significantly from each other in the strength and accessibility of these resources If
they do are these differences an important factor in determining children's success in learning to read and write These are
the main questions that the different chapters in this section on Basic Processes set out to answer **Ai-Enhanced**

Reading Problems Joyce Holt Jennings,JoAnne Schudt Caldwell,Janet W. Lerner,2006 Would the world be a better place if human societies were somehow able to curb their desires for material goods Saleem Ali s pioneering book links human wants and needs by providing a natural history of consumption and materialism with scientific detail and humanistic nuance It argues that simply disavowing consumption of materials is not likely to help in planning for a resource scarce future given global inequality development imperatives and our goals for a democratic global society Rather than suppress the creativity and desire to discover that is often embedded in the exploration and production of material goods which he calls the treasure impulse Ali proposes a new environmental paradigm one that accepts our need to consume treasure for cultural and developmental reasons but warns of our concomitant need to conserve In evaluating the impact of treasure consumption on resource rich countries he argues that there is a way to consume responsibly and alleviate global poverty
