

## **30 Java Technical Questions With Answers**

**\*Q1. How could Java classes direct program messages to the system console, but error messages, say to a file?**

A. The class System has a variable out that represents the standard output, and the variable err that represents the standard error device. By default, they both point at the system console. This how the standard output could be re-directed:  
`Stream st = new Stream(new FileOutputStream("output.txt")); System.setErr(st);  
System.setOut(st);`

**\*Q2. What's the difference between an interface and an abstract class?**

A. An abstract class may contain code in method bodies, which is not allowed in an interface. With abstract classes, you have to inherit your class from it and Java does not allow multiple inheritance. On the other hand, you can implement multiple interfaces in your class.

**\*Q3. Why would you use a synchronized block vs. synchronized method?**

A. Synchronized blocks place locks for shorter periods than synchronized methods.

**\*Q4. Explain the usage of the keyword transient?**

A. This keyword indicates that the value of this member variable does not have to be serialized with the object. When the class will be de-serialized, this variable will be initialized with a default value of its data type (i.e. zero for integers).

**\*Q5. How can you force garbage collection?**

A. You can't force GC, but could request it by calling `System.gc()`. JVM does not guarantee that GC will be started immediately.

**\*Q6. How do you know if an explicit object casting is needed?**

A. If you assign a superclass object to a variable of a subclass's data type, you need to do explicit casting. For example:

`Object a; Customer b; b = (Customer) a;`

When you assign a subclass to a variable having a superclass type, the casting is performed automatically.

**\*Q7. What's the difference between the methods `sleep()` and `wait()`**

A. The code `sleep(1000);` puts thread aside for exactly one second. The code `wait(1000);` causes a wait of up to one second. A thread could stop waiting earlier if it receives the `notify()` or `notifyAll()` call. The method `wait()` is defined in the class `Object` and the method `sleep()` is defined in the class `Thread`.

**Java Interview Questions and Answers** Navneet Singh, Java interview questions often cover a broad range of topics including core Java concepts object oriented programming principles data structures algorithms Java APIs and best practices Here are some common Java interview questions along with sample answers What is Java Java is a high level object oriented programming language developed by Sun Microsystems now owned by Oracle It is designed to be platform independent allowing developers to write code once and run it on any Java enabled platform without recompilation What are the main features of Java Some of the main features of Java include Platform independence Java programs can run on any platform with a Java Virtual Machine JVM Object oriented Java supports object oriented programming principles such as encapsulation inheritance and polymorphism Robustness Java provides strong memory management exception handling and type checking mechanisms to ensure robust and reliable code Multi threading Java supports concurrent execution of multiple threads allowing developers to write scalable and responsive applications Portability Java programs are portable across different platforms making them suitable for developing cross platform applications What is the difference between JDK JRE and JVM JDK Java Development Kit is a software development kit that includes tools for developing and compiling Java applications such as the Java compiler javac and the Java runtime environment JRE JRE Java Runtime Environment is a runtime environment that provides the necessary libraries and components to run Java applications It includes the JVM Java Virtual Machine and core Java libraries JVM Java Virtual Machine is an abstract computing machine that provides an execution environment for Java bytecode It interprets and executes Java bytecode instructions and manages memory threads and other runtime aspects of Java applications What is the difference between abstract class and interface in Java An abstract class is a class that cannot be instantiated and may contain abstract methods methods without a body as well as concrete methods It can also contain instance variables and constructors Subclasses of an abstract class must implement all abstract methods or be declared abstract themselves An interface is a reference type in Java that defines a contract of methods that a class must implement It can only contain constant variables and method signatures without method bodies A class can implement multiple interfaces but can only extend one abstract class What is the difference between Array List and LinkedList in Java Array List is implemented as a dynamic array meaning that it stores elements in a contiguous memory location and supports random access to elements using an index It is efficient for accessing elements by index but less efficient for inserting or removing elements from the middle of the list LinkedList is implemented as a doubly linked list meaning that it stores elements as nodes with references to both the previous and next nodes It is efficient for inserting or

removing elements from the middle of the list but less efficient for random access These are just a few examples of Java interview questions Depending on the role and level of the interview questions may cover more advanced topics such as design patterns concurrency memory management and performance optimization It s important to thoroughly prepare for interviews by reviewing core Java concepts practicing coding exercises and gaining hands on experience with Java programming    The Cumulative Book Index ,1914    **Java 2 Certification** Jamie Jaworski,    Report of the Secretary for Public Instruction ... Queensland. Department of Public Instruction,1892    *Cracking the Coding Interview: 60 JAVA PROGRAMMING QUESTIONS AND ANSWERS* Chinmoy Mukherjee,    **The Publishers Weekly** ,1907

If you ally infatuation such a referred **Java Technical Written Test Questions And Answers** book that will give you worth, get the no question best seller from us currently from several preferred authors. If you want to entertaining books, lots of novels, tale, jokes, and more fictions collections are along with launched, from best seller to one of the most current released.

You may not be perplexed to enjoy all books collections Java Technical Written Test Questions And Answers that we will no question offer. It is not approximately the costs. Its roughly what you obsession currently. This Java Technical Written Test Questions And Answers, as one of the most in action sellers here will totally be in the course of the best options to review.
