which disciplines through their methodologies and ways of authorising knowledge not only discover or reveal knowledge but produce it in ways that involve complex and often ambiguous relationships with power structures and forms of intellectual symbolic and cultural capital One major trend that emerges is that the San and Khoe can no longer be seen as people of the past but have to be acknowledged as contemporary and socially situated individuals and communities who are increasingly contesting the representations which others have imposed on them This book was originally published as a special issue of Critical Arts A Journal of South North Cultural and Media Studies
