

## KEY

## Naming Ionic Compounds

What are the structural units that make up ionic compounds and how are they named?

## What?

When working in chemistry, it is often convenient to write a chemical in symbols. For example we might write down the substance table salt as  $\text{NaCl}$ . In talking about chemistry however, it is a bit tacky to say "en-ay see-ell" when we want to refer to a substance. Also, in formal writing we should use the name of the compound rather than its symbols. Therefore we need to learn how to say the proper names of ionic substances.
