Once dismissed as a fad, Wi-Fi is rapidly becoming ubiquitous in the US and around the world. In 2004 more than half of all laptops sold in the US shipped with Wi-Fi installed. By 2007 most analysts predict that nearly every laptop sold in the US will include Wi-Fi. Nearly 20 million Wi-Fi access points will be sold this year up 20% from last year. As these numbers grow prices will continue to fall making Wi-Fi more attractive to more and more people. By the end of this year there will be more than 40,000 hotspots public Wi-Fi access points available across the US in hotels fast food restaurants cafés airports even parks. By 2007 that number will surpass 100,000. From McDonald's to Kinko's to Holiday Inn Wi-Fi is becoming a killer amenity. Once Wi-Fi networks are in place they can be used for much more than just Internet access. For example the AirPort Express allows users to stream iTunes throughout their homes wirelessly. Wi-Fi is being used to network printers cameras and ultimately home entertainment devices.
