MacCluskie, Jim McHenry, 2018-04-09 Tests and Assessments in Counseling provides students with current information on assessment tools and techniques through detailed case scenarios and vignettes Going beyond basic information about a multitude of assessments the authors focus on the use of instruments in individual cases to allow readers to more fully grasp the integral relationship between tests and assessment data and the counseling process Chapters guide students through choosing the most effective assessment tool successfully administering the assessment and making meaningful and useful results of the data with the client Test questions are also included at the end of each chapter

Argument-Based Validation in Testing and Assessment Carol A. Chapelle, 2020-01-10 Carol A Chapelle shows readers how to design validation research for tests of human capacities and performance Any test that is used to make decisions about people or programs should have undergone extensive research to demonstrate that the scores are actually appropriate for their intended purpose Argument Based Validation in Testing and Assessment is intended to help close the gap between theory and practice by introducing explaining and demonstrating how test developers can formulate the overall design for their validation research from an argument based perspective
