Climate Change and Critical Agrarian Studies Ian Scoones, Saturnino M. Borras Jr., Amita Baviskar, Marc Edelman, Nancy Lee Peluso, Wendy Wolford, 2023-11-30 Climate change is perhaps the greatest threat to humanity today and plays out as a cruel engine of myriad forms of injustice violence and destruction The effects of climate change from human made emissions of greenhouse gases are devastating and accelerating yet are uncertain and uneven both in terms of geography and socio economic impacts Emerging from the dynamics of capitalism since the industrial revolution as well as industrialisation under state led socialism the consequences of climate change are especially profound for the countryside and its inhabitants The book interrogates the narratives and strategies that frame climate change and examines the institutionalised responses in agrarian settings highlighting what exclusions and inclusions result It explores how different people in relation to class and other co constituted axes of social difference such as gender race ethnicity age and occupation are affected by climate change as well as the climate adaptation and mitigation responses being implemented in rural areas The book in turn explores how climate change and the responses to it affect processes of social differentiation trajectories of accumulation and in turn agrarian politics Finally the book examines what strategies are required to confront climate change and the underlying political economic dynamics that cause it reflecting on what this means for agrarian struggles across the world The 26 chapters in this volume explore how the relationship between capitalism and climate change plays out in the rural

world and in particular the way agrarian struggles connect with the huge challenge of climate change Through a huge variety of case studies alongside more conceptual chapters the book makes the often missing connection between climate change and critical agrarian studies The book argues that making the connection between climate and agrarian justice is crucial The chapters in this book were originally published in The Journal of Peasant Studies The Open Access version of this book available at <https://www.taylorfrancis.com/books/oa-edit/10.4324/9781003467960/climate-change-critical-agrarian-studies-ian-scoones-saturnino-borras-jr-amita-baviskar-marc-edelman-nancy-lee-peluso-wendy-wolford> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license A version of the open access title is also available on the OAPEN platform <https://library.oapen.org/handle/20.500.12657/85297> *IPCC 90, Communication Across the Sea, North American & European Practices*, 1990 **IPCC 1989**, 1989 *Greening the Earth with Trees* Cathleen A.
