Adventure and Society Simon Beames, Chris Mackie, Matthew Atencio, 2018-12-28 This undergraduate textbook provides a broad overview of the ways in which adventurous practices influence and are influenced by the world around them The concept of adventure is one that is too often tackled within subject silos of philosophy education tourism or leisure While much of the analysis is strong there is little cross pollination between disciplines Adventure Society pulls together the threads of these discourses into one coherent treatment of the term adventure and the role that it plays in human social life of the 21st century It explores how these practices can be considered more deeply through theoretical discourses of capitalism identity construction technology and social media risk taking personal development equalities and sustainability As such the book speaks to a broad audience of undergraduate and postgraduate students across diverse subject areas and aims to be an accessible starting point for deeper inquiry

Microtravel Charles Forsdick, Zoë Kinsley, Kate Walchester, 2024-06-04 The 2020 COVID 19 pandemic imposed immobility on large sectors of the world's population with confinement becoming an everyday reality The lives of those who previously enjoyed the privileges of being fast castes ground to a halt while at the same time the displacement of more vulnerable populations along well established migration corridors has been radically reduced The result has been a recalibration of the scale of journeying with travellers slowing down their journeys and readjusting their relationship to the proximate and nearby This situation has provided an opportunity for those who study travel and travel writing to rethink their objects of study and approaches to them This volume explores and historicizes the phenomenon of microtravel designating slower journeys within a limited radius which allow and sometimes necessitate new forms of experiencing the world

Routledge Handbook of Mobile Technology, Social Media and the Outdoors Simon Kennedy Beames, Patrick T. Maher, 2024-08-29 This is the first book to explore the numerous ways in which mobile technologies and social media are influencing our outdoor experiences Across the fields of outdoor education outdoor recreation and leisure and nature based tourism the book considers how practices within each of those domains are being influenced by dramatically shifting interactions between technology humans the natural world and wider society Drawing on cutting edge research by leading scholars from around the world and exploring key concepts and theory as well as developments in professional practice the book explains how digital technology and media are no longer separate from typical human and social activity Instead the broader field of outdoor studies can be viewed as a world of intertwined socio technical assemblages that need to be understood in more diverse ways The book offers a full spectrum view of this profound shift in our engagement with the world around us by presenting new work on subjects including networked spaces
