ENGLISH FOR SPECIFIC PURPOSES Dr. Drs. Djuwari, M.Hum, 2025-06-09 English for Specific Purposes for the Nonnative English Students of Economics is designed to support nonnative English speakers in strengthening their reading skills and expanding their vocabulary while gaining a solid understanding of basic economic concepts. The book offers a dual focus enhancing English language proficiency and building economic literacy. Through carefully selected reading passages, students are introduced to fundamental topics such as an Introduction to Economics, Microeconomics vs. Macroeconomics, Market Structures and Competition, The Role of Government in the Economy, and Measuring Economic Performance. Additional chapters explore Money, Banking, and Financial Institutions, Parts 1 and 2, International Trade and Globalization, and Economic Development and Sustainability. Each chapter is structured to reinforce vocabulary acquisition and reading comprehension strategies, equipping students with essential academic skills such as identifying main ideas, summarizing, and making inferences. This book aims to serve as a bridge fostering greater confidence in English proficiency and deeper insights into the dynamic field of Economics, thus opening pathways to future academic and professional opportunities.

Natural Resource Economics Barry C. Field, 2008-03-12 People make decisions regarding the use of natural resources every day, from the individual recycling a sheet of paper to governments of large nations creating energy policy. Those decisions ultimately affect people around the world. Their motivation and results are best framed and analyzed using the tools of natural resource economics. Field presents the methods and applications of the discipline in the latest edition of his popular text. The updated book retains its successful structure, first presenting basic economic principles as they apply to natural resource use and then examining the economic issues surrounding individual resources. New material is included on energy demand and efficiency, nonrenewable resources, individual transferable fishing quotas, water pricing, agricultural cropland programs, and the Endangered Species Act.
