

The Circular Flow of Resources, Goods, Service and Money Payments

One way of describing the overall operation of the entire economy is through a circular flow diagram such as the one on this page. This diagram presents a highly simplified overview of the combined economic system.

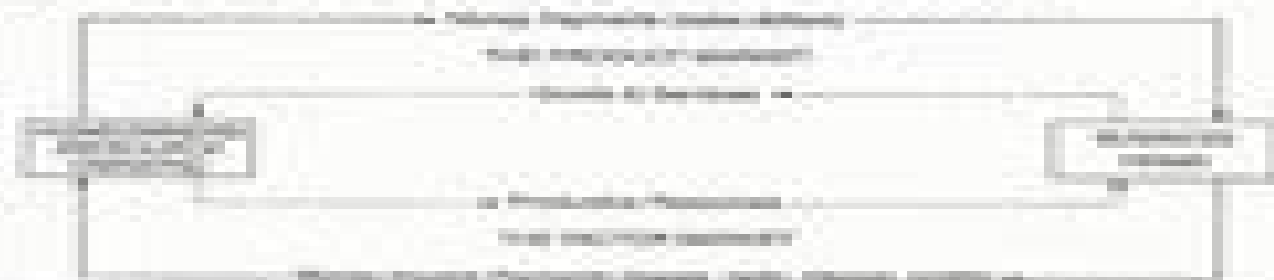

Households (consumers) provide resources (labor) to the owners of the land, labor and capital. In return, business firms in exchange for money provide payments in the form of wages and salaries, interest and profits. Owners of the resources in turn use these financial payments to purchase the finished goods and services supplied by the business firms. Business firms then use the proceeds from these sales to pay the resources owners for the services the firms receive by supplying the resources. This is how the circular flow of resources, goods and services, and money flows payments is established and maintained.

Payments in the lower part of the diagram, which is sometimes called the factor market, represent flows in the resource market when self-producing resources use their own payments (paid in cash) to the business firms that buy productive services.

Payments payments in the upper part of the diagram reflect payments for product markets (paid in cash) to the resource owners who first goods and services, but their own payments (paid in cash) to the business firms that sell goods and services.

The important point to emphasize is that all of the money payments shown in the diagram are then received by an individual or set of owners in a system of interdependent markets where prices operate as a key factor in determining prices. For example, the prices business owners are willing to pay for finished goods and services (reflected in the prices business firms receive for the sale of these resources). The prices of resources, in turn, depend on how much business firms are willing to pay for the services the resource provide. The diagram shows that payments (payments) is received and business cash flow the interaction between the market interactions flows flows.

,1987 **Human Rights and the WTO** Holger Hestermeyer, 2007 The international trading system has come under increasing attack by activists as being in conflict with human rights law Others have defended the system as contributing more to the fulfilment of human rights than many other areas of international law This study examines the alleged conflict of WTO law with international human rights law using one of the most prominent examples of such a conflict that between international patent law ie the TRIPS Agreement and access to medication as guaranteed eg by the International Covenant on Economic Social and Cultural Rights This highly controversial political issue of the appropriate use of international patent law on life saving medicines gained the world s attention during the discussion about the price of AIDS medication but recent instances also include the availability of the patented medication for bird flu and for anthrax The book discusses both the patent law and the international human rights law involved in great depth distinguishing between obligations under different human rights instruments and including a highly readable introduction into both areas of law It then explains the concept of conflict between legal regimes and why patent law and human rights law are in conflict The current state of international law on the conflict between legal regimes and the origin of such conflicts is analyzed covering such issues as hierarchy in international law and introducing the concept of factual hierarchy The book then turns to the role of human rights law in the WTO system concluding that such law currently is limited to aiding the interpreting of the WTO agreements It shows how a further integration of human rights law could be achieved and describes the progress made towards accommodating human rights concerns within the TRIPS Agreement culminating in the first ever decision to amend a core WTO Agreement in December 2005 *Business Education Index* ,1972 **American Book Publishing Record** ,1979 *Directions* ,1980
