Electronic Protection and Security Systems is essential reading for all security system installers and designers. It is also an invaluable guide for managers selecting and supervising security systems, local government police and security-conscious householders and vehicle owners. This book provides a wide-ranging foundation for SITO NVQ students. The second edition of this popular book has been updated to cover the latest technology in ID communication equipment, fire alarm wiring techniques, TV camera links, wireless systems, Paknet etc. Gerard Honey's clear practical text draws on his wealth of experience designing and installing security and protection systems. He is also the author of *Intruder Alarms*, a comprehensive text for the SITO NVQs in that topic. Includes latest technology. Comprehensive practical guide. *Vehicle Security Systems* A. L. Brown, 1996. A concise and thoroughly practical guide to building and installing car alarms. The project-based approach makes this book ideal for students and hobbyists; design and installation engineers will also find it of interest. Every circuit in this book is clearly described and illustrated and contains components that are easy to source. Advice and guidance are based on real experience and the designs themselves have been rigorously put to use on some of the most car-crime-ridden streets in the world. The designs in this book include systems as simple as a warning beacon, a range of immobilisers and a basic alarm system, and more advanced systems that include add-on features such as a personal attack button and a courtesy light delay. Intruder detectors are described and full constructional details are given, including a guide to fault diagnosis and step-by-step installation instructions.
