Process Validation in Manufacturing of Biopharmaceuticals, Third Edition Anurag S. Rathore, Gail Sofer, 2012-05-09

Process Validation in Manufacturing of Biopharmaceuticals Third Edition delves into the key aspects and current practices of process validation. It includes discussion on the final version of the FDA 2011 Guidance for Industry on Process Validation Principles and Practices commonly referred to as the Process Validation Guidance or PVG issued in final form on January 24, 2011. The book also provides guidelines and current practices as well as industrial case studies illustrating the different approaches that can be taken for successful validation of biopharmaceutical processes. Case studies include Process validation for membrane chromatography, Leveraging multivariate analysis tools to qualify scale down models, A matrix approach for process validation of a multivalent bacterial vaccine, Purification validation for a therapeutic monoclonal antibody expressed and secreted by Chinese Hamster Ovary CHO cells, Viral clearance validation studies for a product produced in a human cell line. A much needed resource, this book presents process characterization techniques for scaling down unit operations in biopharmaceutical manufacturing including chromatography, chemical modification reactions, ultrafiltration and microfiltration. It also provides practical methods to test raw materials and in process samples. Stressing the importance of taking a risk based approach towards computerized system compliance, this book will help you and your team ascertain process validation is carried out and exceeds expectations.

**Lloyd's Register Technical Association Session 1986-1987** Lloyd's Register Foundation, 1986-01-01. The Lloyd's Register Technical Association (LRTA) was established in 1920 with the primary objective of sharing technical expertise and knowledge within Lloyd's Register. Publications have consistently been released on a yearly basis with a brief interruption between 1938 and 1946. These publications serve as a key reference point for best practices and were initially reserved for internal use to maximise Lloyd's Register's competitive advantage. Today the LRTA takes a fresh approach focusing on collaboration by combining professional expertise from across the LRTA Group to ensure a frequent output of fresh perspectives and relevant content. The LRTA has evolved into a Group wide initiative that identifies, captures and shares knowledge spanning various business streams and functions. To support this modern approach, the LRTA has adopted a new structure featuring representatives and senior governance across the business streams and the LRTA Foundation. The Lloyd's Register Technical Association Papers should be seen as historical documents representing earlier viewpoints and are not reflective of current thinking and perspectives by the current Lloyd's Register Technical Association. The Lloyd's Register Staff Association (LRTSA) changed its name to the Lloyd's Register Technical Association (LRTA) in 1973.
