Re-agitator Tom Mes, 2013 *Re Agitator* collects more than ten years worth of Tom Mes writing on respected Japanese filmmaker Takashi Miike From dusty film sets in Japan to festival intrigue on the Riviera and from the straight to video ghetto to the stage Mes covers the full scope of this unclassifiable filmmaker's life and work with the kind of detail and intimacy that only an insider can provide This luxurious coffee table hardback also contains previously unpublished material and explores the background and development of the Japanese film industry over the past 20 years *The Oxford Handbook of Film and Media Studies* Robert Kolker, 2008-09-11 This handbook examines film and new media in the light of their convergence It draws on leading scholars in the field to discuss traditional areas of history and theory of film and digital media Its focus however is on the cycle of technologically driven arts Film was born of a number of experiments in reproducing motion all of which culminated in the nineteenth century projection of short films The creation of digital media resulted from experiments in alternative forms of representation in the early 1960s John Whitney began creating avant garde films from digital graphics around 1960 and some of his ideas and methods were incorporated by Stanley Kubrick in 2001 *A Space Odyssey* By the early 1990s commercial filmmakers began to employ digital effects in their work By the late nineties digital arts had come fully into their own both in the form of stand alone or interactive artworks and films created with and for the computer At the same time digital effects had completely overtaken optical printing and matte painting in film From special effects to creating realistic backgrounds and crowds the digital is infiltrating all aspects of filmmaking The infiltration is about to become a takeover as celluloid is replaced by high definition digital recording and projection processes Many aspects of film will change as this latest convergence takes place Already cultural response to film has changed as viewers begin to teach themselves about film through supplementary material on DVDs and to make their own films on home computers But this handbook is not a technical history or manual Quite the contrary it is a scholarly work discussing the aesthetics economics and cultural results of these changes and convergences The book balances traditional scholarship and analysis with essays addressing technological change and the concurrent changes in cultural responses to these changes responses already acknowledged by the profession □□□□, 2006 A quarterly of comparative studies of Chinese and foreign literatures
