Les Bases du Béhaviorisme

Principes Fondamentaux

Le béhaviorisme se concentre sur les comportements observables et mesurables. Il postule que l'apprentissage est le résultat d'associations entre des stimuli et des réponses. La théorie met l'accent sur les conséquences des comportements, suggérant que les récompenses renforcent les comportements souhaitables tandis que les punitions les diminuent.

Concepts clés

Parmi les concepts importants, on retrouve le conditionnement classique (apprentissage par association) et le conditionnement opérant (apprentissage par renforcement). Le conditionnement classique associe un stimulus neutre à un stimulus qui provoque une réponse automatique. Le conditionnement opérant utilise des récompenses ou des punitions pour modifier les comportements.
