has tended to eclipse da Vinci the artist **A Chronology of Leonardo Da Vinci's Architectural Studies After 1500** Carlo Pedretti, Pope Leo X, 1962 **Leonardo Da Vinci and the Art of Sculpture** Gary M. Radke, Martin Kemp, 2009 An innovative look at Leonardo through the lens of the sculpture that he studied the sculptural projects that he undertook and the sculptural works that he inspired Leonardo da Vinci 1452-1519 is renowned as a painter designer draftsman architect engineer scientist and theorist His work as a sculptor is not commonly acknowledged and many have argued that Leonardo believed that sculpture was an inferior art form of lesser genius than painting Challenging and overturning these assumptions Leonardo da Vinci and the Art of Sculpture looks at the sculptural projects that the artist undertook as well as the late Renaissance sculptures that were indebted to him Leonardo consistently drew inspiration from ancient sculpture admired the work of such contemporary sculptural innovators as Donatello and even trained under Andrea del Verrocchio the preeminent bronze sculptor of late 15th century Florence Furthermore Leonardo spent many years of his life working on two larger than life sized horse sculptures Sforza and Trivulzio monuments to Francesco Sforza the Duke of Milan and to Gian Giacomo Trivulzio his successor Although neither was completed the authors argue that these equestrian monuments show how Leonardo was intensely engaged with the design dilemmas of representing a horse rearing on its hind legs Another highlight of the book is a group of new images of the John the Baptist Preaching to a Levite and a Pharisee a recently restored large scale work in the Florentine Baptistery that clearly demonstrates Leonardo's collaboration with Giovanni Rustici Published in association with the High Museum of Art Exhibition Schedule High Museum of Art Atlanta 10-03-09-02-21-10 J Paul Getty Museum 3-23-10-6-20-10 Leonardo Da Vinci [by] V.P. Zubov Vasilii Pavlovich Zubov, 1968 Leonardo Da Vinci was the original Renaissance man a man for all seasons with some of the most profound discoveries and accomplishments ever documented This is the first English translation of the acclaimed Russian volume published in 1962 Zubov presents an interpretative biography in which he seeks to describe the characteristics of Da Vinci's scientific and philosophical ideas **All the Painting of Leonardo Da Vinci**, 1961 **Inventing Leonardo** A. Richard Turner, 1994-10-06 As he examines the changing views of Leonardo since the sixteenth century A. Richard Turner both gives the reader a cultural history in brief of western Europe during this period and provides a context for examining Leonardo's relevance to our own ways of perceiving and interpreting the world Leonardo Da Vinci Patrice Boussel, 1995-12

Essays in the History and Philosophy of Science Pierre Duhem, Pierre Maurice Marie Duhem, 1996-01-01 Here for the first time in English are the philosophical essays including the first statement of the Duhem Thesis that formed the basis for Aim and Structure of Physical Theory together with new translations of the historiographical essays presenting the equally celebrated Continuity Thesis by Pierre Duhem 1861-1916 a founding figure of the history and philosophy of science Prefaced by an introduction on Duhem's intellectual development and continuing significance here as well are important subsequent essays in which Duhem elaborated key concepts and critiqued such contemporaries as Henri Poincare and Ernst Mach

Together these works offer a lively picture of the state of science at the turn of the century while addressing methodological issues that remain at the center of debate today

1478, a Year in Leonardo da Vinci's Career Edoardo Villata, 2021-03-01 1478 was the year in which Leonardo da Vinci aged 26 obtained his first official commission and witnessed the Pazzi Conspiracy against the Medici family In that year he probably opened his independent workshop leaving that of his master Andrea del Verrocchio and in its final months he began to paint two paintings representing the Virgin Mary One of these paintings is very likely the Benois Madonna at the State Hermitage St Petersburg a work that marks a strong change in Leonardo's style and power of expression and his representation of light and human emotions This book provides an in depth analysis of Leonardo's growth as an artist in this year detailing his training his culture his collaboration with Verrocchio and his engagement in the artistic and cultural life of 1460s and 1470s Florence

The Origins of Statics Pierre Duhem, 2012-12-06 If ever a major study of the history of science should have acted like a sudden revolution it is this book published in two volumes in 1905 and 1906 under the title *Les origines de la statique* Paris the place of publication and the Librairie scientifique A Hermann that brought it be enough of a guarantee to prevent a very different outcome Without prompting anyone for some years yet to follow up the revolutionary vistas which it opened up *Les origines de la statique* certainly revolutionized Duhem's remaining ten or so years He became the single handed discoverer of a vast new land of Western intellectual history Half a century later it could still be stated about the suddenly proliferating studies in medieval science that they were so many commentaries on Duhem's countless findings and observations Of course in 1906 Paris and the intellectual world in general were mesmerized by Bergson's *Evolution créatrice* freshly off the press It was meant to bring about a revolution Bergson challenged head on the leading dogma of the times the idea of mechanistic evolution He did so by noting among other things that to speak of vitalism was at least a roundabout recognition of scientific ignorance about a large number of facts concerning life processes He held high the idea of a vital impetus passing through matter and indeed through all matter or the universe an impetus that could be detected only through intuitive knowledge
