Greetings Summoners This is an article that aims to explain and teach players how to improve and refine their skills in League of Legends Due to the vast disparity of skill in the League of Legends community some points may not be understood by inexperienced players simply from lack of in game play time or knowledge The approach that I will take to assist in player improvement may work outside the context of League of Legends and into other MOBA style games But the examples within this guide will all be taken from within the context of League of Legends This is not a guide that is intended to teach how to play any specific champion but rather a complete overview of how to play League of Legends as a whole so if you are looking for a guide on how to play a particular champion this guide is not for you Also for the most part each section in this guide is meant to be standalone so if you do not want to read it in its entirety feel free to skip around      **The Toxic Meritocracy of**

shows why meritocracy is integral to video game design narratives and values Games typically valorize skill and technique and common video game practices such as leveling build meritocratic thinking into the most basic premises Video games are often assumed to have an even playing field but they facilitate skill transfer from game to game allowing certain players a built in advantage The Toxic Meritocracy of Video Games identifies deep seated challenges in the culture of video games but all is not lost As Paul argues similarly meritocratic institutions like professional sports and higher education have found powerful remedies to alleviate their own toxic cultures including active recruiting and strategies that promote values such as contingency luck and serendipity These can be brought to the gamer universe Paul contends ultimately fostering a more diverse accepting and self reflective culture that is not only good for gamers but good for video games as well
