Attachments

- Multiplication Word Problems (PDF)

Introduction (5 minutes)

- Ask your students to identify the problem in one of their favorite stories.
- Tell your students that they will be coming up with their own math story problems.

Explicit Instruction/Teacher modeling (5 minutes)

- Explain that math can be put into story problems. Have the students come up with some examples with you. For example: *It takes five apples to make a pie. Suzie wants to make four apple pies. How many apples will she need? ($5 \times 4 = 20$ apples)*

Guided Practice (10 minutes)

- Show students the Multiplication Word Problems worksheet.
- Go through the worksheet together as a class.
- Draw pictures on the board to represent pictures from the worksheet. Isolating the pictures can help your students write their word problems.

Independent working time (15 minutes)

- Have students think up of at least three different original math stories to write down.
- Encourage students to come up with a theme to help them think of stories. For example, they could write about baking, sports, school, or animals.
