Leica S2 ,2011 **The Lens** NK Guy,2012-10-08 Which lens should I buy for my camera It s such a simple question but choosing the right lens or lenses is actually one of the most important photographic decisions you can make Nothing affects the quality of a photo more than the lens It s no longer just about the megapixels it s the glass that makes all the difference Many first time buyers of DSLRs don t venture past the basic lens included in the box While some are reluctant to spend more money others are confused by all the buzzwords or are overwhelmed by all the choices out there It s really a shame because interchangeable lenses give you amazing scope for quality photography Take in vast sweeping scenes with a wide angle lens Capture faraway birds with a telephoto lens Examine the tiniest detail of a flower with a macro lens Record the perfect portrait with a prime lens Anything is possible when you choose the right lens for the job This book isn t a simple catalogue of available lenses New products are coming out all the time and comparing specific lenses can be difficult Instead author N K Guy gives you all the information you need to make smart buying decisions Optical technology is demystified arcane terminology is decoded and practical tips are provided The Lens will help you build the perfect lens collection to suit your needs now and in the future Frameworks of IT Prosumption for Business Development Pa?kowska,

Readercentric Writing for Digital Media David Hailey,2016-12-05 This book presents an altogether new approach to
writing and evaluating writing in digital media It suggests that usability theory provides few tools for evaluating content
because usability theory assumes only one kind of writing on the Internet The author suggests three models user centric
usability model persuasion centric encouraging the reader to linger and be persuaded Canon camera ads and quality centric
encouraging the reader to linger and learn or be entertained because of the quality of the writing NASA gov and YouTube
Designed for professional writers and writing students this text provides a rubric for writing in digital media but more
importantly it provides a rubric and vocabulary for identifying and explaining problems in copy that already exists The
Internet has become a pastiche of cut and paste content often placed by non writers to fill space for no particular reason or
by computers with no oversight from humans e g Amazon com Because these snippets are typically on topic but often for the
wrong purpose or audience professional writers have difficulty identifying the problems and an even harder time explaining
them Finding an effective tool for identifying and explaining problems in digital content becomes a particularly important
problem as writers increasingly struggle with growing complications in complex information systems systems that create and
manage their own content with little human intervention Being able to look at a body of copy and immediately see that it is
problematic is an important skill that is lacking in a surprising number of professional writers **British Journal of**
