Each lesson has a core textbook reading assignment and activities based on visiting the patients in the hospital. The lessons in the workbook complement the content in the textbook and provide a perfect environment in which students may practice what they are learning in the text. The multi floor virtual hospital also has built in testing of clinical knowledge with NCLEX type questions. As the student visits each patient they are able to access realistic information resources essential for patient care. Encourages active learning and provides opportunities to identify information to collect and process data for evidence based patient care, work with data entry and retrieval screens, optimize use of available information resources, understand hospital information systems, manage information for decision making and maintain and improve core computing skills.
