*Sector* Salah Albakkoush, Emanuele Pagone, Konstantinos Salonitis, 2020 Aircraft Maintenance Repair and Overhaul MRO corporations provide two types of service light and heavy maintenance Typical MRO problems are related to scheduled and unscheduled aircraft maintenance because of the large number of components and parts that need a lead in time for delivery and the consequent scheduling of work This paper focuses on the significant causes of such problems affecting MRO operations It addresses three major factors as follows OEMs Maintenance schedule and manpower and turnaround time By a systematic review and analysis of scientific literature sources it is shown that aviation industry standards do not permit aircraft to be scheduled unless they are maintained according to and comply with the stringent standards related to airworthiness What seems to be important is effective maintenance schedule planning since this reduces time and cost and enables aircraft to be maintained in a short time Unfortunately light maintenance remains beyond the control of airlines because no time allowance is programmed into flight schedules for such events vs increase the number of flight schedule per day

**Pervasive Computing** Patrik Floréen, Antonio Krüger, Mirjana Spasojevic, 2010-05-06 th Welcome to the proceedings of the 8 International Conference on Pervasive Computing Pervasive 2010 After Toronto Sydney and Nara the conference has now returned to Europe Pervasive is one of the most important conferences in the area of pervasive and ubiquitous computing As in the previous year we had two categories of technical papers Full Papers and Notes Pervasive attracted 157 valid submissions from which the Technical Program Committee TPC accepted 24 full papers and one note resulting in an overall acceptance rate of 16% The submissions included 628 authors from 27 countries representing all the continents except Antarctica As we can see from these figures Pervasive is a truly global highly competitive conference A major conference such as Pervasive requires a rigorous and objective process for selecting papers This starts with the selection of a high quality TPC We were fortunate to be able to draw on the wisdom and experience of our 28 TPC members from the most prestigious universities and research labs in Europe North America and Asia This committee was aided by the input of no less than 238 external reviewers chosen on the basis of their domain knowledge and relevance to pervasive computing The papers were selected using a double blind review with four peer reviews per paper and a discussion phase among the reviewers and a discussion of the papers in the TPC meeting which was held in Palo Alto during December 12-13 2009 We thank Nokia Research Center for hosting the meeting

**Advanced Techniques for Maintenance Modeling and Reliability Analysis of Repairable Systems** Garima Sharma, Rajiv Nandan Rai, 2023-09-27 ADVANCED TECHNIQUES FOR MAINTENANCE MODELING AND RELIABILITY ANALYSIS OF REPAIRABLE SYSTEMS This book covers advanced models and methodologies for reliability analysis of large complex and critical repairable systems that undergo imperfect maintenance actions in industries having MRO facilities and also covers real life examples from the field of aviation The content presented in this book is inspired by the existing limitations of the generalized renewal process GRP model and the problems confronted by the maintenance repair and operations MRO

facilities in industries dealing with large and complex repairable systems Through this book the authors have attempted to equip the MRO facilities with more advanced scientific tools and techniques by addressing various limitations related to the reliability analysis of repairable systems The book is dedicated to various imperfect maintenance based virtual age models and methodologies to bridge various research gaps present in the available literature A summary of deliverables is as follows Presents the basic concepts of maintenance and provides a virtual age model that can accommodate all maintenance Provides the basic concepts of censoring in repairable systems along with the concept of black box and failure modes Also highlighted is how the proposed work will be useful for industries conducting failure modes and effect analysis FMEA and estimating the mean residual life MRL of repairable systems Presents methodology that applies risk based threshold on intensity function and provides a threshold to declare the system component as high failure rate components HFRCs Identifying a system as HFRCs is an important task but for an industry dealing with critical systems preventing the system from being HFRC is more important since the risk involved in such systems would be very high Thus the book presents a progressive maintenance policy PMP for repairable systems Focusses on qualitative analysis of repair quality Assuming repair quality as a subjective variable the authors have presented various factors that affect the repair quality most and modeled their interdependency using Bayesian networks BN Audience Professional reliability engineers reliability administrators consultants managers and post graduate students in engineering schools The book belongs to any engineering technical and academic institution concerned with manufacturing production aviation defense and software industries
