From Head Shops to Whole Foods Joshua C. Davis, 2017-08-08 In the 1960s and 70s a diverse range of storefronts including head shops African American bookstores feminist businesses and organic grocers brought the work of the New Left Black Power feminism environmentalism and other movements into the marketplace Through shared ownership limited growth and democratic workplaces these activist entrepreneurs offered alternatives to conventional profit driven corporate business models By the middle of the 1970s thousands of these enterprises operated across the United States but only a handful survive today Some such as Whole Foods Market have abandoned their quest for collective political change in favor of maximizing profits Vividly portraying the struggles successes and sacrifices of these unlikely entrepreneurs From Head Shops to Whole Foods writes a new history of social movements and capitalism by showing how activists embraced small businesses in a way few historians have considered The book challenges the widespread but mistaken idea that activism and political dissent are inherently antithetical to participation in the marketplace Joshua Clark Davis uncovers the historical roots of contemporary interest in ethical consumption social enterprise buying local and mission driven business while also showing how today's companies have adopted the language but not often the mission of liberation and social change

*Russia and the New World Disorder* Bobo Lo, 2015-08-17 The Russian annexation of Crimea was one of the great strategic shocks of the past twenty five years For many in the West Moscow's actions in early 2014 marked the end of illusions about cooperation and the return to geopolitical and ideological

confrontation Russia for so long a peripheral presence had become the central actor in a new global drama In this groundbreaking book renowned scholar Bobo Lo analyzes the broader context of the crisis by examining the interplay between Russian foreign policy and an increasingly anarchic international environment He argues that Moscow's approach to regional and global affairs reflects the tension between two very different worlds the perceptual and the actual The Kremlin highlights the decline of the West a resurgent Russia and the emergence of a new multipolar order But this idealized view is contradicted by a world disorder that challenges core assumptions about the dominance of great powers and the utility of military might Its lesson is that only those states that embrace change will prosper in the twenty first century A Russia able to redefine itself as a modern power would exert a critical influence in many areas of international politics But a Russia that rests on an outdated sense of entitlement may end up instead as one of the principal casualties of global transformation

Ukraine Over the Edge Gordon M. Hahn, 2018-02-08 The Ukrainian crisis that dominated headlines in fall 2013 was decades in the making Two great schisms shaped events one within Ukraine its western and southeastern parts divided along cultural and political lines the other was driven by geopolitical factors Competition between Russia and the West exacerbated Ukraine's divisions This study focuses on the historical background and complex causality of the crisis from the rise of mass demonstrations on Kiev's Maidan Nezalezhnosti Independence Square to the making of the post revolt regime In the context of a new cold war the author sheds light on the role of radical Ukrainian nationalists and neofascists in the February 2014 snipers massacre the ouster of President Viktor Yanukovich and Russia's seizure of Crimea and involvement in the civil war in the eastern region of Donbass
