The Aftermath of Partition in South Asia Gyanesh Kudaisya, Tan Tai Yong, 2004-03-01 This book draws upon new theoretical insights and fresh bodies of data to historically reappraise partition in the light of its long aftermath It uses a comparative approach by viewing South Asia in its totality rather than looking at it in narrow national terms As the first book to focus on the aftermath of partition it fills a distinctive niche in the study of contemporary South Asia *Monographic Series* Library of Congress, 1980 *Memorandum Folio* Association of American Geographers. Drawing Futures Bob Sheil, Frédéric Migayrou, Luke Pearson, Laura Allen, 2016-11-11 Drawing Futures brings together international designers and artists for speculations in contemporary drawing for art and architecture Despite numerous developments in technological manufacture and computational design that provide new grounds for designers the act of drawing still plays a central role as a vehicle for speculation There is a rich and long history of drawing tied to innovations in technology as well as to revolutions in our philosophical understanding of the world In reflection of a society now underpinned by computational networks and interfaces allowing hitherto unprecedented views of the world the changing status of the drawing and its representation as a political act demands a platform for reflection and innovation Drawing Futures will present a compendium of projects writings and interviews that critically reassess the act of drawing and where its future may lie Drawing Futures focuses on the discussion of how the field of drawing may expand synchronously alongside technological and computational developments The book coincides with an international conference of the same name taking place at The Bartlett School of Architecture UCL in November 2016 Bringing together practitioners from many creative fields the book discusses how drawing is changing in relation to new technologies for the production and dissemination of ideas
