Memo Of Geography 2015 June:

Who Needs Gay Bars? Greggor Mattson, 2023-05-30 Gay bars have been closing by the hundreds The story goes that increasing mainstream acceptance of LGBTQ people plus dating apps like Grindr and Tinder have rendered these spaces obsolete Beyond that rampant gentrification in big cities has pushed gay bars out of the neighborhoods they helped make hip Who Needs Gay Bars considers these narratives accepting that the answer for some might be maybe nobody And yet Jarred by the closing of his favorite local watering hole in Cleveland Ohio Greggor Mattson embarks on a journey across the country to paint a much more complex picture of the cultural significance of these spaces inside big four gay cities but also beyond them No longer the only places for their patrons to socialize openly Mattson finds in them instead a continuously evolving symbol a physical place for feeling and challenging the beating pulse of sexual progress From the historical archives of Seattle's Garden of Allah to the outpost bars in Texas Missouri or Florida that serve as community hubs for queer youth these are places of celebration where the next drag superstar from Alaska or Oklahoma may be discovered They are also fraught grounds for confronting the racial and gender politics within and without the LGBTQ community The question that frames this story is not asking whether these spaces are needed but for whom earnestly exploring the diversity of folks and purposes they serve today Loosely informed by the Damron Guide the so called Green Book of gay travel Mattson logged 10 000 miles on the road to all corners of the United States His destinations are sometimes thriving sometimes struggling but all offering intimate views of the wide range of gay experience in America POC white trans cis past present and future

Drawing Futures Bob Sheil, Frédéric Migayrou, Luke Pearson, Laura Allen, 2016-11-11 Drawing Futures brings together international designers and artists for speculations in contemporary drawing for art and architecture Despite numerous developments in technological manufacture and computational design that provide new grounds for designers the act of drawing still plays a central role as a vehicle for speculation There is a rich and long history of drawing tied to innovations in technology as well as to revolutions in our philosophical understanding of the world In reflection of a society now underpinned by computational networks and interfaces allowing hitherto unprecedented views of the world the changing status of the drawing and its representation as a political act demands a platform for reflection and innovation Drawing Futures will present a compendium of projects writings and interviews that critically reassess the act of drawing and where its future may lie Drawing Futures focuses on the discussion of how the field of drawing may expand synchronously alongside technological and computational developments The book coincides with an international conference of the same name taking place at The Bartlett School of Architecture UCL in November 2016 Bringing together practitioners from many creative fields the book discusses how drawing is changing in relation to new technologies for the production and dissemination of ideas

Defenders of Japan Garren Mulloy, 2021-12-01 Japan s navy is three times the size of France s and Britain s combined yet most people think it a defenceless nation This book unravels that paradox A Global Idea Mayssoun Sukarieh, 2023-08-15 A Global Idea outlines how youth as shown by the Arab Spring uprisings and subsequent state responses became a prominent social and political category during the first two decades of the twenty first century in the Middle East Drawing on ethnographic fieldwork interview data and textual analysis Mayssoun Sukarieh explains that the spread of youth as an important category is linked to the operation of a global youth development complex a diverse transnational network of state private sector civil society and international development aid organizations that worked through key urban areas such as Washington DC Amman and Dubai In its analysis of the arrival extension and embedding of the youth development complex in the Middle East during this period A Global Idea addresses a broader question that is of global and not just regional concern How are certain ideas that are central to the working and reproduction of global capitalism able to travel the world so that they are found virtually everywhere **Dictionary Catalog of the National Agricultural Library, 1862-1965** National Agricultural Library (U.S.), 1967 **Naval War College Review** , 2017 S & T Post , 2011 Missile Contagion Dennis M. Gormley, 2008-05-30 Most books on missile proliferation focus on the spread of ballistic missiles or cruise missiles not both Gormley s work however explains why cruise missiles are beginning to spread widely but does so by explaining their spread in the context of ballistic missile proliferation It therefore treats both ballistic and cruise missile proliferation as related phenomenon This work also focuses evenhandedly on both nonproliferation and defense policy including missile defenses and counterforce doctrines to fashion a set of integrated strategies for dealing with ballistic and cruise missile proliferation Signs of missile contagion abound In this study Gormley argues that a series of rapid and surprising developments since 2005 suggest that the proliferation of missiles capable of delivering either weapons of mass destruction or highly accurate conventional payloads is approaching a critical threshold The surprising fact is that land attack cruise missiles not ballistic missiles constitute the primary problem Flying under the radar both literally and figuratively land attack cruise missiles add a dangerous new dimension to protecting U S security interests and preventing regional military instability Gormley asserts that cruise missiles are not destined to supplant ballistic missiles rather they are likely to join them because when both are employed together they could severely test even the best missile defenses Worse yet Gormley argues land attack cruise missiles are increasingly being linked to preemptive strike doctrines which are fueling regional arms races and crisis instability This work explains why an epidemic of cruise missile proliferation long forecasted by analysts has only recently begun to occur After first assessing the state of ballistic missile proliferation Gormley explores

the role of three factors in shaping the spread of cruise missiles These include specialized knowledge needed for missile development narrative messages about reasons for acquiring cruise missiles and norms of state behavior about missile nonproliferation policy and defense doctrine This book then addresses the policy adjustments needed to stanch the spread of cruise missiles in the first place or barring that cope militarily with a more demanding missile threat consisting of both cruise and ballistic missiles Catalogue of the Library of the Graduate School of Design, Harvard University Harvard University.
