Examining the economic forces that will shape Africa's future Africa's Lions examines the economic growth experiences of six fast growing and or economically dominant African countries Expert African researchers offer unique perspectives into the challenges and issues in Ethiopia Ghana Kenya Mozambique Nigeria and South Africa Despite a growing body of research on African economies very little has focused on the relationship between economic growth and employment outcomes at the detailed country level A lack of empirical data has deprived policymakers of a robust evidence base on which to make informed decisions By harnessing country level household firm and national accounts data together with existing analytical country research the authors have attempted to bridge this gap The growth of the global working age population to 2030 will be driven primarily by Africa which means that the relationship between growth and employment should be understood within the context of each country's projected demographic challenge and the associated implications for employment growth A better understanding of the structure of each country's workforce and the resulting implications for human capital development the vulnerably employed and the working poor will be critical to informing the development policy agenda As a group the six countries profiled in Africa's Lions will largely shape the continent's future Each country chapter focuses on the complex interactions between economic growth and employment outcomes within the individual Africa's Lions context
