this book we have attempted to identify skills which are needed by the psychiatric nurse and in doing so to identify a body of knowledge unique to the professional psychiatric nurse The book has been written to demonstrate the basis of a skills approach for both the experienced and the inexperienced nurse to build upon for we believe that psychiatric nurses due to both their training and their particular mixture of interests are well equipped to be in the forefront of psychiatry as a developing art and science We hope that this book in some small way helps this development Some of the more recent advances in psychiatric nursing have been reinforced by the publication of a training syllabus for mental nurses English and Welsh National Boards 1982 This document highlights the need for a change from a medical model to a social model and from a task oriented learning experience to a skills approach We have attempted to reflect this change in emphasis by including such aspects as personal development and self awareness human sexuality the nursing process and counselling skills

**Nursing Skills for Children and Young People's Mental Health** Laurence Baldwin, 2019-08-02 This book focuses on those nursing skills that are truly valued and needed by children and young people with mental health problems Whilst other books have chiefly focused on mental health conditions and treatments this book moves away from this formulaic approach and considers what children and youth themselves need most from health professionals It shows why nursing skills are among the most precious values for patients This focus on therapeutic relationships establishing trust based forms of nursing and empowering children and young people to develop into healthy and resilient young adults has largely been neglected despite the feedback from those who urgently need help but often struggle to find it or are wary of seeking help and reluctant to engage This book focuses on the places where nurses encounter young people and seek to help them It examines the role nurses play in specialist child and

adolescent mental health settings such as in patient and community as psychotherapists and on self harm teams and where paediatrics nurses work with troubled young people in emergency departments paediatric wards and primary care It also considers two specific areas namely eating disorder services and consent seeking that could benefit from nursing skills that are currently undervalued but are in fact invaluable Its focus on those skills that nurses already have but may not be consciously using will make this book uniquely appealing to all nurses who work with children and young people with mental health problems regardless of the setting and an essential guide for students and experienced professionals alike
