Asgary, Dina Frutos-Bencze, Massood V. Samii, Hossein Varamini, 2021-01-01 The arrival of the COVID 19 pandemic throughout the globe at the end of 2019 turned global business upside down It forced the closure of many businesses disrupted global supply chains reduced travel across borders and created fear about face to face interactions As the lockdowns in many countries created uncertainty about the future business activities global business leaders were scrambling to find new strategies to safely re establish their business relationships with their stakeholders The existing historical economic social and racial injustice in the American society toward Black Indigenous and People of Color was compounded by the COVID 19 This led the movements of the Black Lives Matter to reenergize and become a global phenomenon The horrific and sad death of George Floyd and many others triggered huge global movements to demand respect for human rights and dignity for all Additionally climate change and environmental degradation have caused unprecedented forests fires more frequent and damaging hurricanes and migration demand a revived global business book This third edition of Global Business An Economic Social and Environmental Perspective incorporates global business issues related to COVID 19 the economic and social injustice of BIPOC and environmental degradation where it is appropriate The reader will understand the impact of these critical global business issues discussed in the book through examples case studies and thought provoking discussions These challenges require businesses governments and the active engagement of citizens to succeed The aim of this book is to bring these issues for discussion and action by these stakeholders Each chapter includes supplementary PowerPoint slides Test Bank and Teaching notes that are available for instructors only COLLECTIVE INSTITUTIONS IN INDUSTRIALIZED NATIONS: Economic Lessons for sub-Saharan Africa Samuel Enajero, Ph.D., 2015-12-08 Fundamental institutions are core values that originate from beliefs Beliefs reflect on behaviors and repeated behaviors become habits Shared habits are peoples values which when ingrained become norms and customs Societies that believed in human interdependency formed collective institutions These institutions are compatible with modern economic prosperity Thus Contrary to conventional economic teaching which implies that behaviors including preferences are biologically determined all socially relevant behaviors including economic behaviors are acquired learned and routinized through habits institutions in which individuals find themselves Again contrary to popular beliefs that economics is about pursuit of self interest as stipulated by Adam Smith

1776 the pursuit of self interest does not translate to selfishness For example an entrepreneur relies on public capitals and skilled labors to succeed a producer relies on adequate consumption to produce at capacity a firm s profit is enhanced with higher consumer income etc Therefore capitalism is a function of collective institutions Collectivism is a solution to group interdependency People sharing the same space are interdependent and are faced with interdependency costs Interdependency cost equals external cost plus decision making cost Failures to eliminate or minimize external costs externalities through collectivization of activities result to resource misallocation The problem of sub Saharan Africa Moreover modern development theories are constructed around macroeconomic variables Money banking interest rate savings trade liberalization financial assets deficit and debt management are modern macroeconomic development tools These are based on aggregation of data and variables Thus collectivism is more pronounced in macroeconomic policies Yet many emerging nations of sub Saharan Africa do not find it mandatory to build all inclusive economies by mobilizing resources en masse Study Guide for Microeconomics in Modules Paul Krugman,Robin Wells,2013-12-18
