L'innovation Sociale Principes Et Fondements Dun Concept:

L'innovation sociale emmanuelle Besancon, 2013-12-15 L'innovation sociale est définie comme toute nouveauté qui répond un besoin individuel ou collectif et qui recrée des liens sociaux pour vivre en société. Si l'innovation sociale interpelle sa signification, les pratiques qu'elle recouvre et ses enjeux pour les acteurs ne sont pas toujours clairement perçus. L'objectif de cet ouvrage est de clarifier l'émergence, les différentes approches et les éléments de caractérisation en vue de proposer une définition et une méthodologie d'évaluation de l'innovation sociale.

Advanced Intelligent Systems for Sustainable Development (AI2SD'2019) Mostafa Ezziyyani, 2020-03-03 This book gathers papers from the International Conference on Advanced Intelligent Systems for Sustainable Development AI2SD 2019 held on July 08-11 2019 in Marrakech Morocco which address the environment industry and economy and the role of advanced intelligent systems and computing in connection with these three fields. The book includes a host of interesting studies and successful applications regarding the economy and industry e.g. in Manufacturing Digital Factories Smart Supply Chain Management in Industry Project Management in Industry Digital Economy Digital Business M-commerce Blockchain and Digital Currencies. In addition, the book highlights work that addresses the environmental aspect covering topics such as Big Data Analysis the Internet of Things for Environmental Management Sensor Networks for Environmental Services Network Interoperability in Environmental Ecosystems Wireless Sensors and Cognitive Radio Networks Environmental Management Computing Systems Sustainable Mobility Solutions Remote Sensing Applications Geo-information Geophysics. Addressing social, legislative and environmental aspects, the book is intended for all stakeholders in the industrial world. It will be of interest e.g. to customers helping them improve their profits and economic profitability and to professionals and fishermen working to evolve and optimize their supply chains and to improve productivity in the fiercely competitive I4.0 world. The authors of each chapter report on the state of the art and present the outcomes of their own research, laboratory experiments and successful applications. The purpose of the book is to combine the idea of advanced intelligent systems with appropriate tools and techniques for modeling, management and decision support in the fields of the environment, industry and economy.

Managing Competences Benoit Grasser, Sabrina Loufrani-Fedida, Ewan Oiry, 2020-10-30 *Managing Competences Research Practice and Contemporary Issues* draws together theoretical and practical research in competence management. It provides a wealth of knowledge concerning emerging and contemporary issues such as the multilevel approach to competence, the development of collective competence, the strategies of competence management and the tools for managing competences as well as the organizational dynamics of competences. Moreover, the book provides a critical approach to research and practitioners' continued engagement in competence management research and practice. Research in competence management has more recently entered an era more open to doubt and questioning. Is there a solid theoretical foundation that supports the concept of competence? What is the contribution of research on employees' competences to

human resources management in particular and more generally to management Is there not a risk of diluting the concept of competence by considering it at the individual collective organizational and strategic levels Today is it still possible to manage competences in a world where the boundaries of the organizations are more and more porous These questions and many others probably explain why a field that seemed well identified and well structured yesterday has given way today to new highly diverse analyses of competences by researchers and practitioners This contributed volume seeks to answer these pressing issues and is a collective means for responding to them The book brings together multiple streams of research in the field about emerging and contemporary issues including multidimensional HRM systems the rise of forms of collaborative management the intensification of the use of digital and robotic technologies the rise of the regime of remote and networked operations the increasing heterogeneity of the status of workers and changes in regulations concerning work and its recognition

Management and Resilience of African Organizations in Times of Crisis Shani D. Carter, Sara Bensal, 2024-05-16 Businesses in African countries continued to face crises due to COVID 19 supply chain and climate change Governments can take steps to increase businesses resilience by supporting and promoting sustainable development In turn businesses can increase their resilience by promoting the resilience of their employees This book explores the current state of management and resilience in African nations and discusses issues that revolve around its reciprocal impact on global business government and society Featuring select papers from the 4th Annual Current Business Issue in African Countries CBIAC Conference held in Agadir Morocco in 2023 this book focuses on the synergies between climate change supply chain and sustainable development particularly post pandemic featuring content from business and NGO leaders faculty and students The impetus of the CBIAC conference was the discussions held at the United Nations Conference on Trade and Development UNCTAD held in Nairobi Kenya in July 2016 and in Bridgetown Barbados and Geneva in October The goal of the conference is to create long term collaborative relationships between business leaders faculty researchers students and community members from different African nations

Urban Design and Planning for Age-Friendly Environments Across Europe: North and South Elisa Pozo Menéndez, Ester Higuera García, 2022-09-29 This book represents a multidisciplinary and international vision across different countries in Europe that are facing similar challenges about ageing and quality of life in present cities It is divided in three main topics from the global context of health in cities and reduction of health inequities to the current research of different study cases focusing on residential models and the relationship with the built environment The third chapter illustrates best practices with some study cases from different cities in Europe Friendlier environments for older people come together with the need of innovation smart and updated technologies healthier environments and mitigation of climate change Health re appears nowadays as one of the priorities for urban planning and design not only for the communicable diseases and the effect of the pandemics but also for the non communicable diseases that were also triggering the wellbeing and equity of our cities Indeed the Covid 19 pandemic has highlighted health

inequities and vulnerabilities of those areas of the city that were already deprived and facing other health problems such as obesity diabetes social isolation respiratory problems or mental health issues specifically applying for vulnerable groups Older adults have been one of the most affected groups from the pandemic s threats and derived consequences In this context the care crisis arises intertwined with the design and planning of our cities where there is an urgent need to regenerate our environments with a perspective of sustainability inclusion and health prevention and promotion From the global urban challenges to the specific contextualisation of each city and study cases each chapter offers an updated insight of the main questions that we should consider to address urban planning and design from the perspective of ageing and social inclusion in European cities

Advanced Introduction to Social Innovation Frank Moulaert,Diana

MacCallum,2019 Social innovation SI has in the last decade or so become an important idea and concept in policy practice and scholarship surrounding human development It is often seen as an antidote to narrowly defined technological and market oriented modes of innovation Its historical significance and development tied to centuries of struggles for social change remain under appreciated and unacknowledged This Advanced Introduction explores the historical and contemporary meanings of social innovation and its relationship with political and social movements It develops an understanding of SI as a form of ethical practice for meeting needs transforming social relations and collectively empowering communities to shape the future Additionally it proposes that ethical research should aim to be socially innovative in this sense and provides concrete suggestions of how this concern can be embodied in action research and community development methodologies
