Integrated Care for Complex Patients Steven A. Frankel, James A. Bourgeois, 2018-03-21 This book presents case based descriptions of models for the inclusive multispecialty and multidisciplinary clinical care of complex cases. Cases range from primary care patients with complex systemic medical and psychiatric comorbidity to those requiring specialty care to those with potentially terminal illnesses. While each category and case has its unique requirements often necessitating different models of care, the commonalities in approaching complex clinical situations is underscored. Extended case narratives written by the treating physicians summarizing both the course of clinical care and physicians' reflections on the challenges of managing complex patients comprise the bulk of the book. Five additional chapters on systems issues associated with care of complex patients together with a chapter on end of life considerations, a narrative analysis of the physicians' reflections about complex patients, and a concluding chapter are prominently included to anchor the case narratives. Written by experts in the field, these descriptions form unique models for assessing and treating complex cases. *Integrated Care for Complex Patients* is a useful guide for all health practitioners and health administrators who are responsible for clinically complex cases including physicians in primary care and psychiatry, physician assistants, nurse practitioners, and psychologists.

The Oxford Handbook of Psychotherapy Ethics explores a whole range of ethical

issues in the heterogenous field of psychotherapy thereby closing a widespread perceived gap between ethical sensitivity technical language and knowledge among psychotherapists The book is intended not only for a clinical audience but also for a philosophical ethical audience linking the two disciplines by fostering a productive dialogue between them thereby enriching both the psychotherapeutic encounter and the ethical analysis and sensitivity in and outside the clinic An essential book for psychotherapists in clinical practice it will also be valuable for those professionals providing mental health services beyond psychology and medicine including counsellors social workers nurses and ministers
