Intervention in Mental Health-Substance Use David B. Cooper, 2016-09-19 The Mental Health Substance Use series provides clear guidance for professionals on this complex and increasingly recognised field. It concentrates on the concerns, dilemmas and concepts that impact on the life and well-being of affected individuals and those close to them and the future direction of practice, education, research, services, intervention and treatment. Mental health substance use is a complex and varied phenomenon and this volume stresses an appreciation that interventions that work for one individual or family may prove ineffective for another. It therefore explores the needs of individuals and carers, the nature of the therapeutic relationship and the theory and application of a variety of interventional techniques. These include group therapy, cognitive behaviour therapy, CBT, motivational interviewing, MI, brief interventions and many more. The volumes in this series are designed to challenge concepts and stimulate debate, exploring all aspects of the development in treatment, intervention and care response and the adoption of research-led best practice. They are essential reading for mental health and substance use professionals, students and educators.

From *Effects of Substance Abuse Treatment on AIDS Risk Behaviors* you will discover drug abuse treatment methods that will reduce the number of injection episodes and reduce injection use in higher risk settings such as shooting galleries, thereby reducing your clients' risk of infection. *Effects of Substance Abuse Treatment on AIDS Risk Behaviors* reveals the stark realities regarding substance abusers and HIV risk. Through this compelling book you will gain new insight into how you can help drug abusers avoid contracting HIV/AIDS by discussing intervention methods that do not adhere to abstinence-based treatment models such as reducing a stimulant binge by one day, examining the dangerous effects that methadone clinics who discharge patients for cocaine use can have on the reduction of risk behaviors among heroin addicts, discovering the correlation that exists between the fact that opioid-dependent individuals who have more drug and legal problems are at a higher risk for AIDS risk.
