Origination Andy Pike, 2015-03-24 *Origination The Geographies of Brands and Branding* offers innovative theoretical and conceptual frameworks relating to the ways that actors create meaning and value in commodity brands and branding through processes of geographical association. Provides innovative conceptualization and theorization to facilitate an understanding of the geographical dimensions of brands and branding. Challenges current interpretations of brands as vehicles of homogenization in globalization. Establishes the theoretical and conceptual foundations of a more geographically sensitive approach through rigorous empirical examination of the under researched geographical differentiation of commodity brands and branding. Presents innovative new research and analysis of the socio spatial biographies of the Newcastle Brown Ale, Burberry and Apple brands. Forges strong new connections between political and cultural economy approaches within geography. Provides a distinctive and incisive conceptual and theoretical framework capable of engaging other branded commodities and their branding in other times and places.

Exclusion and Inclusion in International Migration: Power, Resistance and Identity Armağan Teke Lloyd, 2019-04-30 People on the move face new barriers in a globalizing world. Some of these barriers are related with the rise of an increasingly security oriented approach towards international migrants. Notwithstanding the forces of globalization states have maintained their monopoly power over whom to admit and whom to deny within their borders. In other words they remain the sovereign authority regulating the entry and exit of people. However in recent years a number of states have singled out international immigration as the greatest political and social threat to their cultural and national security. The securitization of immigration is founded upon the premise that the international movement of people represents an exceptional risk for the survival of the nation and this is often associated with terrorism, instability and criminality. The securitization of immigration is also based on the idea that the traditional authority vested in states to regulate immigration is somehow insufficient and needs to be enhanced. These assumptions correspond with a real policy shift in some countries such as the United States where the government is planning to spend approximately 23 Billion Dollars on border security and immigration enforcement in 2019 alone. This edited volume is an exploration of the global landscapes inhabited by refugees and labour migrants although the focus is largely on the former. Despite the fact that most of the empirical studies are drawn from within Europe the book also includes research on Nepal, Australia, the Middle East and Japan in order to reveal the truly global dimensions of migration and the regimes governing this. **Content** INTRODUCTION by Armağan Teke Lloyd PART A Ideology and Governance of Migration CHAPTER 1 Coming to Terms with Liberal Democracy by the Populist Radical Right Parties of Western Europe Evidence from European Parliament Speeches over Minorities and Migration by Caner Tekin CHAPTER 2 A Forest with many trees Mapping migration governance and the dispersion of authority in Europe by Lisa Marie Borrelli Rebecca Mavin and Giorgia Trasciani CHAPTER 3 Policing Migrants in Transit and Upon Arrival The Bordering Tactic of Integration in Austria and Germany by Olivia
