## Description

Hauler A30C consists of two main parts, the tractor unit and the trailer unit.

The two units are joined through the hitch which allows movement around a vertical axis for steering, the steering joint, and around an horizontal axis, the frame joint, for independent movement of the two vehicle parts.

The tractor unit consists of a six-cylinder diesel engine, transmission and dropbox as well as a drive axle. The cab is rubber mounted in the frame. The drive axle is spring mounted relative to the frame.

The trailer unit consists of frame, tippable dump body and front and rear drive axles, which are connected through a bogie suspension.

The hauler has a permanent 4-wheel drive and 6-wheel drive which can be engaged and disengaged. It has a longitudinal differential lock in the dropbox and differential locks in the drive axles.
