Mental Health Practice for the Occupational Therapy Assistant is a comprehensive text that delineates the role of the occupational therapy assistant in the delivery of mental health services. Christine Manville and Jeremy Keough provide information and learning activities that enable the student to build knowledge of mental health practice incorporating approaches used in the traditional medical model as well as the community. The impact of mental illness on occupational performance across the lifespan is also examined. Mental Health Practice for the Occupational Therapy Assistant guides the reader in how to analyze the service environment including cultural, societal, and political factors; explore the client's participation in age-appropriate, meaningful occupations; and under supervision of the occupational therapist, provide treatment that includes individual and group interventions. Mental Health Practice for the Occupational Therapy Assistant structures each chapter to provide an enhanced approach to student learning by incorporating concepts from Bloom's Taxonomy. Current and emerging trends in mental health practice are discussed as well as service provision in the traditional medical model. The appendices include a discussion of additional factors that impact the provision and efficacy of therapy services, including pharmacology and ethical and legal issues. Features: Provides an overview of the DSM-5 and the World Health Organization's International Classification of Functioning, Disability, and Health. These classification systems provide a common language for practitioners from a variety of disciplines to communicate about the impact of mental illness on occupational performance and participation. Describes the use of general educational strategies to enhance the teaching/learning process in the provision of occupational therapy services. Terminology from the Occupational Therapy Practice Framework, Third Edition, is utilized to enhance the development of clinical reasoning and practice skills. Provides information on how to communicate effectively with clients. Mental health practice is viewed across the lifespan. Instructor's materials include PowerPoint presentations, student study sheets, tests, questions, and application questions for each chapter. Included with the text are online supplemental materials for faculty use in the classroom.
