Health and Development Iris Borowy, Bernard Harris, 2023-01-30 Health and development require one another there can be no development without a critical mass of people who are sufficiently healthy to do whatever it takes for development to occur and people cannot be healthy without societal developments that enable standards of health to be maintained or improved However the ways in which health and development interact are complex and contested This volume unites eleven case studies from nine countries in three continents and two international organizations since the late nineteenth century Collectively they show how different actors have struggled to reconcile the sometimes contradictory nature of health and development policies and the subordination of these policies to a range of political objectives **WALNECK'S CLASSIC**
