Neuropsychological Testing: From Psychometrics to Clinical Neuropsychology Alessio Facchin,Elisa Cavicchiolo,Edgar Chan,2025-02-10 Neuropsychological testing represents an essential part of the clinical examination of neuropsychological patients and these measures remain the primary instrument for clinical research in neuropsychology For these reasons old procedures were psychometrically investigated to assess their metrical properties As a result of the redesigned procedures old tests were improved in terms of their psychometric properties and characteristics The field of neuropsychological testing needs to be updated with new research in order to improve the clinical practice of neuropsychological testing the psychometric characteristics of new neuropsychological tests and the theories behind the testing in a circular way In this research topic we want to report recent advances and changes from old standard diagnostic testing to more recent procedures and methods in the area of cognitive testing Applications comparisons novel definitions and measures updated procedures and psychometric properties of existing instruments measurement invariance reliability repeatability specific norms particular applications and use in specific patients are all welcome Open access tests methods and procedures are encouraged together with studies that follow the Open Science initiative This topic joins two different backgrounds in this area of research psychometrics and neuropsychology and all studies in these areas will be considered included reviews and meta analyses Co-creating Knowledge with Fishers: Challenges and Lessons for Integrating Fishers' Knowledge Contributions into Marine Science in Well-Developed Scientific Advisory Systems Nathalie A. Steins,Matthew R. Baker,Kate Brooks,Steven Mackinson,Robert Stephenson,2023-12-29 Signal Processing and Machine Learning for Biomedical Big Data Ervin Sejdic,Tiago H. Falk,2018-07-04 Within the healthcare domain big data is defined as any high volume high diversity biological clinical environmental and lifestyle information collected from single individuals to large cohorts in relation to their health and wellness status at one or several time points Such data is crucial because within it lies vast amounts of invaluable information that could potentially change a patient s life opening doors to alternate therapies drugs and diagnostic tools Signal Processing and Machine Learning for Biomedical Big Data thus discusses modalities the numerous ways in which this data is captured via sensors and various sample rates and dimensionalities Capturing analyzing storing and visualizing such massive data has required new shifts in signal processing paradigms and new ways of combining signal processing with machine learning tools This book covers several of these aspects in two ways firstly through theoretical signal processing chapters where tools aimed at big data be it biomedical or otherwise are described and

secondly through application driven chapters focusing on existing applications of signal processing and machine learning for big biomedical data This text aimed at the curious researcher working in the field as well as undergraduate and graduate students eager to learn how signal processing can help with big data analysis It is the hope of Drs Sejdic and Falk that this book will bring together signal processing and machine learning researchers to unlock existing bottlenecks within the healthcare field thereby improving patient quality of life Provides an overview of recent state of the art signal processing and machine learning algorithms for biomedical big data including applications in the neuroimaging cardiac retinal genomic sleep patient outcome prediction critical care and rehabilitation domains Provides contributed chapters from world leaders in the fields of big data and signal processing covering topics such as data quality data compression statistical and graph signal processing techniques and deep learning and their applications within the biomedical sphere This book s material covers how expert domain knowledge can be used to advance signal processing and machine learning for biomedical big data applications
