La Voragine Spanish Edition:

The Twentieth-Century Spanish American Novel Raymond Leslie Williams, 2009-07-21 A Choice Magazine

Outstanding Academic Book Spanish American novels of the Boom period 1962-1967 attracted a world readership to Latin American literature but Latin American writers had already been engaging in the modernist experiments of their North American and European counterparts since the turn of the twentieth century. Indeed, the desire to be modern is a constant preoccupation in twentieth-century Spanish American literature and thus a very useful lens through which to view the century's novels. In this pathfinding study, Raymond L. Williams offers the first complete analytical and critical overview of the Spanish American novel throughout the entire twentieth century. Using the desire to be modern as his organizing principle, he divides the century's novels into five periods and discusses the differing forms that the modern took in each era. For each period, Williams begins with a broad overview of many novels, literary contexts, and some cultural debates, followed by new readings of both canonical and significant non-canonical novels. A special feature of this book is its emphasis on women writers and other previously ignored and/or marginalized authors, including experimental and gay writers. Williams also clarifies the legacy of the Boom, the Postboom, and the Postmodern as he introduces new writers and new novelistic trends of the 1990s.

The Spanish American Regional Novel Carlos J. Alonso, 1990 This study provides a radical re-examination of the regional novel, which played a central part in the development of Latin American fiction in the first half of the twentieth century. Professor Alonso presents his argument through challenging readings of three works: Rivera's *La Voragine*, Gallegos's *Dona Barbara*, and Guiraldes's *Don Segundo*.

A History of Ecology and Environmentalism in Spanish American Literature Scott M. DeVries, 2013-09-05 A History of Ecology and Environmentalism in Spanish American Literature undertakes a comprehensive ecocritical examination of the region's literature from the foundational texts of the nineteenth century to the most recent fiction. The book begins with a consideration of the way in which Argentine Domingo Faustino Sarmiento's views of nature, through the lens of the categories of civilization and barbarity from *Facundo* (1845), are systematically challenged and revised in the rest of the century. Subsequently, this book develops the argument that a vital part of the cultural critique and aesthetic innovations of Spanish American modernismo involve an ecological challenge to deepening discourses of untamed development from Europe and the United States. In other chapters, many of the well-established titles of regional and indigenista literature are contrasted to counter-traditions within those genres that express aspects of environmental justice, deep ecology, the relational role of emotion in nature, protectionism and conservationism, even the rights of non-human nature. Finally, the concluding chapters find that the articulation of ecological advocacy in recent fiction is both more explicit than what came before but also impacts the formal elements of literature in unique ways. Textual conventions such as language, imagery, focalization, narrative sequence, metafiction, satire, and parody represent innovations of form that proceed directly from the ethical advocacy of environmentalism. The book concludes with comments about what must follow as a

result of the analysis including the revision of canon the development of literary criticism from novel approaches such as critical animal studies and the advent of a critical dialogue within the bounds of Spanish American environmentalist literature A History of Ecology and Environmentalism in Spanish American Literature attempts to develop a sense of the way in which ecological ideas have developed over time in the literature particularly the way in which many Spanish American texts anticipate several of the ecological discourses that have recently become so central to global culture current environmentalist thought and the future of humankind

The Poetics of Plants in Spanish American Literature Lesley Wylie,2020-12-08 The Poetics of Plants in Spanish American Literature examines the defining role of plants in cultural expression across Latin America particularly in literature From the colonial georgic to Pablo Neruda s Canto general Lesley Wylie s close study of botanical imagery demonstrates the fundamental role of the natural world and the relationship between people and plants in the region Plants are also central to literary forms originating in the Americas such as the New World Baroque described by Alejo Carpentier as nacido de rboles The book establishes how vegetal imaginaries are key to Spanish American attempts to renovate European forms and traditions as well as to the reconfiguration of the relationship between humans and nonhumans Such a reconfiguration which persistently draws on indigenous animist ontologies to blur the boundaries between people and plants anticipates much contemporary ecological thinking about our responsibility towards nonhuman nature and shows how environmental thinking by way of plants has a long history in Latin American literature

The Literature of Spanish America Angel Flores,1969 **The Lost Rib** Sharon Magnarelli,1985 This study focuses on three basic questions 1 Why is the Spanish American novel nearly devoid of memorable female protagonists 2 How do the novels portray their female characters and 3 Why do even those novels whose titles promise female protagonists ultimately focus on other topics and characters

there is the history of ideas on the other a structuralist approach belonging to the anthropology of myth which gives pride of place to the study of cultural textures By using both Bartra develops what he calls an evolutionist perspective capable of constructing a history of myths or perhaps an anthropology of ideas one that helps us to understand the long sequences of events without losing sight of the presence of structures The evolutionist approach goes beyond sequential narration but does not limit itself to the formal examination of mythological structures It focuses our attention on certain periods when transformations occur in the myth and thus sheds light on moments of transition in Western culture The Artificial Savage will prove useful for students and professors in history anthropology literary history and criticism cultural studies sociology biological sciences psychiatry and psychology BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved Publications of the Modern Language Association of America Modern Language Association of America,1939 Vols for 1921 1969 include annual bibliography called 1921 1955 American bibliography 1956 1963 Annual bibliography 1964 1968 MLA international bibliography **University of California Union Catalog of Monographs Cataloged by the Nine Campuses from 1963 Through 1967: Authors & titles** University of California (System).
