Moderne For Ever Figures:

The Figure of the Nymph in Early Modern Culture ,2018-03-20 Throughout the early modern period the nymph remained a powerful figure that inspired and informed the cultural imagination in many different ways Far from being merely a symbol of the classical legacy the nymph was invested with a surprisingly broad range of meanings Working on the basis of these assumptions and thus challenging Aby Warburg s famous reflections on the nympha that both portrayed her as cultural archetype and reduced her to a marginal figure the contributions in this volume seek to uncover the multifarious roles played by nymphs in literature drama music the visual arts garden architecture and indeed intellectual culture tout court and thereby explore the true significance of this well known figure for the early modern age Contributors Barbara Baert Mira Becker Sawatzky Agata Anna Chrzanowska Karl Enenkel Wolfgang Fuhrmann Michaela Kaufmann Andreas Keller Eva Bettina Krems Damaris Leimgruber Tobias Leuker Christian Peters Christoph Pieper Bernd Roling and Anita Traninger

Good Furniture and Decoration ,1929 *Good Furniture Magazine* ,1929 **Modern Mathematics** Dirk De Bock,2023-03-08 The international New Math developments between about 1950 through 1980 are regarded by many mathematics educators and education historians as the most historically important development in curricula of the twentieth century It attracted the attention of local and international politicians of teachers and of parents and influenced the teaching and learning of mathematics at all levels kindergarten to college graduate in many nations After garnering much initial support it began to attract criticism But as Bill Jacob and the late Jerry Becker show in Chapter 17 some of the effects became entrenched This volume edited by Professor Dirk De Bock of Belgium provides an outstanding overview of the New Math modern mathematics movement Chapter authors provide exceptionally high quality analyses of the rise of the movement and of subsequent developments within a range of nations The first few chapters show how the initial leadership came from mathematicians in European nations and in the United States of America The background leaders in Europe were Caleb Gattegno and members of a mysterious group of mainly French pure mathematicians who since the 1930s had published under the name of a fictitious Nicolas Bourbaki In the United States there emerged during the 1950s various attempts to improve U S mathematics curricula and teaching especially in secondary schools and colleges This side of the story climaxed in 1957 when the Soviet Union succeeded in launching Sputnik the first satellite Undoubtedly this is a landmark publication in education The foreword was written by Professor Bob Moon one of a few other scholars to have written on the New Math from an international perspective The final epilogue chapter by Professor Geert Vanpaemel a historian draws together the overall thrust of the volume and makes links with the general history of curriculum development especially in science education including recent globalization trends **Discourse, Figure** Jean-François Lyotard,2011 Antony Hudek is research fellow at Camberwell College of Arts University of the Arts London *Oklahoma Moderne* Mark Andrew White,Olinka Hrdy,Fred Jones Jr. Museum of Art,2007 **Humanism and Christian Letters in Early Modern**

Iberia (1480-1630) Alejandro Coroleu, 2010-05-11 Even though humanism derived its literary moral and educational predilections from ancient Greek and Roman models it was never an inherently secular movement and it soon turned to religious questions Humanists were of course brought up with Christian beliefs regarded the Bible as a fundamental text and many of them were members of the clergy either regular or secular While their importance as religious sources was undiminished biblical and patristic texts came also to be read for their literary value Renaissance authors who aspired to be poetae christianissimi naturally looked to the Latin Fathers who reconciled classical and Christian views of life and presented them in an elegant manner The essays offered in this volume examine the influence of Christian Latin literature whether biblical patristic scholastic or humanistic upon the Latin and vernacular letters of the Iberian Peninsula in the period 1480 to 1630 The contributions have been organized into three thematically coherent groups dealing with transmission adaptation and visual representation Contrary to most studies on the Iberian literature of the period in which practically no essays are devoted to texts other than in Spanish this volume successfully accommodates authors writing in Portuguese and Catalan Likewise a significant part of the pieces presented here is concerned with literary texts written in Latin Moreover it shows how the interests and preoccupations of the better known authors of the Iberian Renaissance were also shared by contemporary figures whose choice of language may have resulted in their exclusion from the canon
