La Science En Questions:

La science et le monde moderne d'Alfred North Whitehead? François Beets, Michel Dupuis, Michel Weber, 2013-05-02 The second international Chromatiques whiteheadiennes conference was devoted exclusively to the exegesis and contextualization of Whitehead's Science and the Modern World 1925 In order to elucidate the meaning and significance of this epoch making work the Proceedings are designed to form companion volume With one paper devoted to each of its thirteen chapters the Proceedings aim on the one hand to identify the specific contribution of each chapter to Whitehead's own research program that is to say to put its categories into perspective by means of an internal analysis and on the other hand to identify its global impact in the history of ideas

Paulin Hountondji and the Science Question in Africa Zeyad el Nabolsy, 2025-07-18 This book offers a systematic reconstruction of Paulin Hountondji's contributions to the debate about the place of modern science on the African continent The book shows that Hountondji develops an account of modern science that is sociologically sensitive to the entanglement between modern science and colonialism on the African continent without falling into epistemic relativism about the claims of modern science It is argued that Hountondji's views on modern science express a strong historical materialist influence and that he develops a theory of science that draws both on the Hessen Grossmann hypothesis and dependency theory Thus this book brings together two strands of historical materialist thought about science that have hitherto been isolated from one another This book is of interest to scholars who specialize in African philosophy history and philosophy of science global philosophy and African studies

Pourquoi la Science et la Foi vont de Pair Malcolm A. Jeeves, 2023-04-12 Lorsque nous essayons de nous comprendre et de comprendre le monde dans lequel nous vivons nous nous tournons souvent d'abord vers la science et ensuite s'il reste des lacunes dans notre compréhension nous essayons de les combler en nous référant à Dieu et à notre foi Cette approche que nous appelons le dieu des lacunes a une longue histoire et malheureusement elle est encore bien vivante aujourd'hui Ce livre a été écrit pour offrir une approche alternative en posant cette question fondamentale comment les chrétiens ayant reçu une éducation formelle peuvent-ils maintenir leur honnêteté intellectuelle et en même temps être fidèles à la fois à l'Écriture et à la science Ce livre donne des exemples de quelques uns des problèmes les plus épineux qui se posent aujourd'hui dans le domaine de la science et de la foi et propose des moyens de réfléchir de manière constructive à chacun d'entre eux Malcolm A Jeeves est professeur émérite de psychologie à l'université de St Andrews en Écosse ancien président de la Société royale d'Édimbourg et de l'Académie nationale d'Écosse et membre de l'Académie des sciences médicales et de la Société britannique de psychologie Pionnier de la psychologie cognitive de la neuropsychologie et de la psychologie évolutionniste il est l'auteur de nombreux ouvrages sur la science et la foi
