Modern Spectroscopy Hollas Solutions Manual:

Molecular Physics and Elements of Quantum Chemistry Hermann Haken, Hans Christoph Wolf, 2013-04-18 Since the publication of the first edition of this book there have been many important new developments in the field of molecular physics. The new methods and results which are most significant for students are treated extensively in this second edition. Among these are in particular single molecule spectroscopy and the field of molecular electronics which is in a stage of rapid development including the areas of electroluminescence and organic light emitting diodes. In addition we have extended and corrected the earlier material in a number of places. We have also included exercises in this new edition they will allow students to deepen their understanding and offer a basis for further individual study. The complete solutions to the exercises can be found on the Internet under www.springeronline.com 3 540 40792 S. We are grateful to Mr C D Bachem and Dr Th Schneider of the Springer Verlag for their continuous and very agreeable cooperation during the preparation of the book. We thank our colleague Prof W D Brewer for his competent translation. Stuttgart February 2004 H Haken H C Wolf. Preface to the First Edition. This textbook is intended for use by students of physics, physical chemistry and theoretical chemistry. The reader is presumed to have a basic knowledge of atomic and quantum physics at the level provided for example by the first few chapters in our book *The Physics of Atoms and Quanta*.

Modern Spectroscopy John Michael Hollas, 2004-01-16 The fourth edition of *Modern Spectroscopy* introduces the reader to a wide range of spectroscopies and includes both the background theory and applications to structure determination and chemical analysis. It covers rotational, vibrational, electronic, photoelectron and Auger spectroscopy as well as EXAFS and the theory of lasers and laser spectroscopy. New material includes laser detection and ranging, LIDAR, cavity ring down spectroscopy, femtosecond lasers, femtosecond spectroscopy and very high resolution fluorescence of large molecules. In addition the clarity of figures has been greatly improved and Professor Ben van der Veken at the University of Antwerp has run some new infrared spectra especially for this new edition. A revised and updated edition of a successful clearly written textbook. *Modern Spectroscopy* Fourth Edition includes the latest developments in modern laser techniques, contains a discussion of molecular symmetry, provides numerous worked examples, calculations and questions at the end of chapters, improved clarity of many of the figures. Written by an author with many years teaching and research experience. *Modern Spectroscopy* Fourth Edition will prove invaluable for students of chemistry, physics and chemical physics studying atomic and molecular spectroscopy, lasers and laser spectroscopy and molecular symmetry.

Molekülphysik und Quantenchemie Hermann Haken, Hans C. Wolf, 2013-04-17 *Molekülphysik und Quantenchemie* führt systematisch und leicht zugänglich in die Grundlagen der beiden Gebiete ein wie es zum Verständnis der physikalischen Eigenschaften von Molekülen und der chemischen Bindung erforderlich ist. Aufbauend auf Grundkenntnissen aus der Atom und Quantenphysik von den gleichen Autoren vermittelt es den Studenten der Physik der Physikalischen Chemie und der Theoretischen Chemie die experimentellen und theoretischen Grundlagen und deren
