**Modern Chemistry** Holt Rinehart & Winston, Holt, Rinehart and Winston Staff, 2001      Technical Book Review Index, 1920      **Volume 1: Modern Electrochemistry** John O'M. Bockris, Amulya K.N. Reddy, 2007-05-08 This book had its nucleus in some lectures given by one of us J O M B in a course on electrochemistry to students of energy conversion at the University of Pennsylvania. It was there that he met a number of people trained in chemistry, physics, biology, metallurgy, and materials science, all of whom wanted to know something about electrochemistry. The concept of writing a book about electrochemistry which could be understood by people with very varied backgrounds was thereby engendered. The lectures were recorded and written up by Dr Klaus Muller as a 293 page manuscript. At a later stage A K N R joined the effort; it was decided to make a fresh start and to write a much more comprehensive text. Of methods for direct energy conversion, the electrochemical one is the most advanced and seems the most likely to become of considerable practical importance. Thus conversion to electrochemically powered transportation systems appears to be an important step by means of which the difficulties of air pollution and the effects of an increasing concentration in the atmosphere of carbon dioxide may be met. Corrosion is recognized as having an electrochemical basis. The synthesis of nylon now contains an important electrochemical stage. Some central biological mechanisms have been shown to take place by means of electrochemical reactions. A number of American organizations have recently recommended greatly increased activity in training and research in electrochemistry at universities in the United States.      *Chemistry and Industry Review*, 1928      *Prentice Hall Chemistry*, 2000      **Chemical Engineering and Mining Review**, 1924      Chemical News and Journal of Industrial Science, 1881      **The Chemical News and Journal of Industrial Science**, 1879      *Readers' Guide to Periodical Literature* Anna Lorraine Guthrie, 1915 An author subject index to selected general interest periodicals of reference value in libraries      **Readers' Guide to Periodical Literature**, 1915      *The Cambridge Review*, 1898      *New York Review of the Telegraph and Telephone and Electrical Journal*, 1901      *The Siebel Technical Review*, 1928      Mining and Chemical Engineering Review, 1916      Chemical News and Journal of Physical Science, 1909      **The Chemical News**, 1906      *India Rubber World and Electrical Trades Review*, 1927      **The Chemical News : and Journal of Physical Science**, 1906      **Chemistry** Oxtoby, 1994      **Practical Druggist and Pharmaceutical Review of Reviews**, 1925
