Against Accident and Self-organization Dean L. Overman, 2001-04-11 In this illuminating book Dean L Overman uses logical principles and mathematical calculations to answer the questions that have long perplexed biologists and astrophysicists Is it mathematically possible that accidental processes caused the formation of the first form of living matter from non living matter Could accidental processes have caused the formation of a universe compatible with life Are current self organization scenarios for the formation of the first living matter plausible Overman reviews the influence of metaphysical assumptions in logical analysis and discusses the principles of logic applicable to these questions examining the limitations of verbal and mathematical logic He proceeds to demonstrate that it is mathematically impossible that accidental processes produced the first living matter The author also examines other issues related to the creation of the universe including Stephen Hawking s no boundary proposal the need for a Creator as the preserving cause of the universe and the explanations offered by the weak and strong anthropic principles Acclaimed by theologians and scientists alike as well argued coherent and persuasive *A Case Against Accident and Self Organization* is a fascinating study of the origins of life and our universe

Evolution of Consciousness Vincent Frank Bedogne, 2008-07-20 From the alpha to the omega Pierre Teilhard de Chardin offers an evolution of consciousness paradigm of the universe and a triumphant vision of humankind and its future Guided by a creative process that motivated Teilhard Vincent Frank Bedogne aims to unite matter with consciousness science with spirituality He looks beyond Darwin and the big bang beyond traditional ideas of God religion and the human role in existence As he does we realize that the universe is crossing the most profound threshold in its evolution since the dawn of reflective thought a thousand lifetimes ago and like the threshold to reflection this blossom of transcendence is unfolding within us The book philosopher Pierre Teilhard de Chardin would have written had he lived another fifty years **Blueprint for Reconstruction** Vincent Frank Bedogne, 2010-04-14 Inspired by a vision of soaring
