Class 10 History

Chapter 5 - Print Culture and The Modern World

More than 5,500 years ago, people started writing. However, it took time and effort to write manually or inscribe on materials like stone, leather, etc. So for a long time, ideas and knowledge were spread orally among the masses.

It was only after the invention of printing that ideas started to travel faster. Books, newspapers, historical documents, autobiographies, scientific documents, etc., contributed tremendously to the world's progress.

Your NCERT Class 10 Social Science History Chapter 5 talks about how printing technology came into being and how the print culture shaped society, ideas, and knowledge.

Printing In China:

- Although the Sumerian civilizations used some primary forms of printing, China is considered the birthplace of printing. Woodblock printing first originated in this country.
- In China, woodblock printing started from 594 AD onwards. And when the Tang Dynasty came to power in 618 AD, the emperors immensely helped in the progress of woodblock printing.

Printing In Japan:

- In Japan, the Chinese missionaries propagated the art of printing to spread Buddhism. This is how hand printing technology came to Japan from 768 AD onwards.
- Diamond Sutra is regarded as the earliest known printed Japanese book. This book is regarded as the world's oldest printed book. It was dated May 11, 868 AD.

Modern World History Chapter Notes:

The Origins of the Modern World Robert Marks, 2006-12-07 This clearly written and engrossing book presents a global narrative of the origins of the modern world from 1400 to the present Unlike most studies which assume that the rise of the West is the story of the coming of the modern world this history drawing upon new scholarship on Asia Africa and the New World constructs a story in which those parts of the world play major roles Robert B Marks defines the modern world as one marked by industry the nation state interstate warfare a large and growing gap between the wealthiest and poorest parts of the world and an escape from the biological old regime He explains its origins by emphasizing contingencies such as the conquest of the New World the broad comparability of the most advanced regions in China India and Europe the reasons why England was able to escape from common ecological constraints facing all of those regions by the 18th century and a conjuncture of human and natural forces that solidified a gap between the industrialized and non industrialized parts of the world Now in a new edition that brings the saga of the modern world to the present the book considers how and why the United States emerged as a world power in the twentieth century and became the sole superpower by the twenty first century Once again arguing that the rise of the United States to global hegemon was contingent not inevitable Marks also points to the resurgence of Asia and the vastly changed relationship of humans to the environment that may in the long run overshadow any political and economic milestones of the past hundred years E mail textbooks rowman com for a username and password to access the instructor site
