**Negotiating a Conversation** The approach this course uses recognizes that it takes new Spanish speakers years to become fluent However if a nurse learns the medical vocabulary and strategies to properly negotiate a conversation s he can learn to work through virtually any situation in a relatively short period of time For example if a patient says something a nurse doesn t understand the nurse can ask them to repeat it or say it slower If a nurse doesn t know how to say something s he can point to it and ask C mo se dice How do you say that These and many other techniques that are taught to help a nurse work through new situations

**Use of Technology** The use of technology can be very helpful to get through tricky situations However if a nurse only uses technology this provides a poor patient experience and demonstrates poor bedside manner Also if only technology is used body language and gestures are missed and the meaning can be misinterpreted It is recommended that the nurse continue learning as much as possible using this course and software then use technology to fill in the gap
