## **Natural Resources Energy Holt Environmental Science:**

*Energy, Natural Resources and Environmental Economics* Endre Bjørndal, Mette Bjørndal, Panos M. Pardalos, Mikael Rönqvist, 2010-09-14 This book consists of a collection of articles describing the emerging and integrated area of Energy Natural Resources and Environmental Economics. A majority of the authors are researchers doing applied work in economics, finance and management science and are based in the Nordic countries. These countries have a long tradition of managing natural resources. Many of the applications are therefore founded on such examples. The book contents are based on a workshop that took place during May 15-16, 2008 in Bergen, Norway. The aim of the workshop was to create a meeting place for researchers who are active in the area of Energy, Natural Resource and Environmental Economics and at the same time celebrate Professor Kurt Jorns' 60th birthday. The book is divided into four parts. The first part considers petroleum and natural gas applications taking up topics ranging from the management of incomes and reserves to market modeling and value chain optimization. The second and most extensive part studies applications from electricity markets including analyses of market prices, risk management, various optimization problems, electricity market design and regulation. The third part describes different applications in logistics and management of natural resources. Finally, the fourth part covers more general problems and methods arising within the area.

**Natural Resources** Judith Rees, 2017-10-19 In this book first published in 1990 Judith Rees considers the spatial distribution of resource availability, development and consumption and the distribution of resource generated wealth and welfare. Showing that there are no simple answers, she analyses the complex interactions between economic forces, administrative structures and political institutions. This well structured text is essential reading for upper level students in geography, environmental planning, economics and resource management.
